

## From the journals. . . .

### Acta cybernetica

Vol. 9 No. 4

#### Articles

Recognizable sets of finite bilabelled transition systems

*A. Arnold*

A note on axiomatizing flowchart schemes

*V. E. Cazanescu, Gh. Ștefanescu*

On the multidimensional vector bin packing

*J. Csirik, J. B. G. Frenk, M. Labbé, S. Zhang*

Product hierarchies of automata and homomorphic simulation

*P. Dömösi, Z. Ésik*

A note on the axiomatization of iteration theories

*Z. Ésik*

Investigations on Armstrong relations, dependency inference, and excluded functional dependencies

*G. Gottlab, L. Libkin*

The complexity of a counting finite-state automaton

*C. A. Rich, G. Slutzki*

Decision problems arising from knapsack transformations

*A. Salomaa*

Preserving two-tuple dependencies under projection

*B. Thalheim, S. Al-Fedhagi*

### AI communications

Vol. 3 No. 4

#### Articles

Compiling object declarations into connectionist networks

*P. Floréen, P. Myllymäki, P. Orponen, H. Tirri*

#### Conference reports

ECAI '90: The invited speakers

*Jacobijn Sandberg*

The 4th international workshop on qualitative physics

*Bert Bredeweg, Siebren Groothuis*

The second European workshop on modelling autonomous agents and multi-agent worlds

*Nigel Seel*

Expert systems in Sweden

*Mehdi Sagheb-Tehrani*

#### ECCAI News

#### Calendar

#### Colophon

### Artificial intelligence in medicine

Vol. 3 No. 1

#### Editorial

*P. Torasso*

#### Articles

Flexible reasoning about patient management using multiple models

*W. J. Long*

Utilizing detailed anatomical knowledge for hypothesis formation and hypothesis testing in rheumatological decision support

*W. Horn*

Using quantitative and qualitative constraints in models of cardiac electrophysiology

*J. Hunter, I. Kirby, N. Gotts*

#### Calendar

## AI magazine

### Vol. 11 No. 5

#### Articles

The truth, the whole truth, and nothing but the truth

*João P. Martins*

Artificial intelligence and molecular biology

*Lawrence Hunter*

#### Workshop, panel, & symposium reports

Issues in the design of AI-based schedulers

*Karl Kempf, Claude Le Pape, Stephen Smith, Barry Fox*

AI-based schedulers in manufacturing practice

*Karl Kempf, Bruce Russell, Sanjiv Sidhu, Stu Barrett*

Second international workshop on user modeling

*Sandra Carberry*

The first international workshop on human and machine cognition, Pensacola, Florida. Topic: the frame problem

*Eric Dietrich*

Workshop on defeasible reasoning with specificity and multiple inheritance

*R. P. Loui*

Knowledge discovery in real databases: a report on the IJCAI-89 workshop

*Gregory Piatetsky-Shapiro*

Task communication through natural language and graphics

*Norman Badler, Bonnie Webber*

Knowledge-based environments for teaching and learning

*Beverly Park Woolf, Elliot Soloway, William Clancey, Kurt Van Lehn, Dan Suthers*

1988 workshop on principles of hybrid reasoning

*Alan Frisch, Anthony Cohn*

A bibliography on hybrid reasoning

*Alan Frisch, Richard Scherl*

Full-sized knowledge-based systems research workshop

*Barry Silverman, Arthur Murray*

Theory and application of minimal-length encoding

*Edwin Pednault*

### Vol. 12 No. 1

#### Articles

A survey of the eighth national conference on artificial intelligence: pulling together or pulling apart?

*Paul R. Cohen*

Case-based reasoning: a research paradigm

*Stephen Slade*

Controlling a "black box" simulation of a space craft

*Claude Summut, Donald Michie*

The computational metaphor and artificial intelligence: a reflective examination of a theoretical falsework

*David M. West, Larry E. Travis*

The use of artificial intelligence by the U.S. navy: case study of a failure

*Stephen B. Sloane*

## Artificial intelligence review

### Vol. 4 No. 4

#### Articles

Intelligent tutoring systems: an overview

*Hyacinth S. Nwana*

Planning in a commonsense framework

*Carlos Pinto-Ferreira, João Pavão Martins*

#### Book reviews

Artificial intelligence and education

*T. Drapkin*

Artificial intelligence and philosophy

*A. Ramsay*

Artificial intelligence and its applications

*S. Hedges, A. P. Magill, E. P. Curran, M. Merabti, M. Davies, T. Dodd, T. C. Fogarty*

#### Books recently received

#### Index

## Artificial intelligence

**Vol. 47 Nos. 1-3**

**Special volume**

**Foundations of artificial intelligence**

**Articles**

Foreword

*D. Kirsh*

Foundations of AI: the big issues

*D. Kirsh*

Logic and artificial intelligence

*N. J. Nilsson*

Rigor mortis: a response to Nilsson's "Logic and artificial intelligence"

*L. Birnbaum*

Open information systems semantics for distributed artificial intelligence

*C. Hewitt*

Social conceptions of knowledge and action: DAI foundations and open systems semantics

*L. Gasser*

Intelligence without representation

*R. A. Brooks*

Today the carwig, tomorrow man?

*D. Kirsh*

On the thresholds of knowledge

*D. B. Lenat, E. A. Feigenbaum*

The owl and the electric encyclopedia

*B. C. Smith*

A preliminary analysis of the Soar architecture as a basis for general intelligence

*P. S. Rosenbloom, J. E. Laird, A. Newell, R. McCarl*

Approaches to the study of intelligence

*D. A. Norman*

**Vol. 48 No. 1**

**Articles**

Attributive concept descriptions with complements

*M. Schmidt-Schauß, G. Smolka*

Automatic analysis of one-parameter planar ordinary differential equations by intelligent numerical simulation

*E. P. Sacks*

Animate vision

*D. H. Ballard*

Connectionist hashed associate memory (research note)

*R. L. Greene*

Multi-player alpha-beta pruning (research note)

*R. E. Korf*

**Books received**

**Book reviews**

**Announcements**

**Forthcoming papers**

**Vol. 48 No. 2**

**Articles**

Constraint relaxation may be perfect

*U. Montanari and F. Rossi*

On the justification of Dempster's rule of combination

*F. Voorbraak*

Floating conclusions and zombie paths: two deep difficulties in the "directly skeptical" approach to defeasible inheritance nets (research note)

*D. Makinson, K. Schlechta*

Extended causal theories (research note)

*J. Bell*

Notes on "a clash of intuitions" (research note)

*E. Neufeld*

**Books received**

**Book reviews**

**Forthcoming papers**

## Applied artificial intelligence

**Vol. 5 No. 1**

**Special issue on artificial intelligence: future, impacts, challenges—Part 1**

**Articles**

Machine intelligence and the human window

*Donald Michie*

Importance of similarity measure and analogical inference

*Makoto Nagao*

Artificial intelligence for social citizenship: toward an anthropocentric technology

*Karamjit S. Gill*

Perspectives in knowledge representation

*Luigia Carlucci Aiello, Daniele Nardi*

CYC: a mid-term report

*R. V. Guha, Douglas B. Lenat*

The challenge of deep models, inference structures, and abstract tasks

*Werner Horn*

The future of artificial intelligence: learning from experience

*Roger C. Schank, Stephen B. Slade*

## Cognitive science

**Vol. 14 No. 4**

**Articles**

**Cognitive science news**

Learning plan schemata from observation: explanation-based learning for plan recognition

*Raymond J. Mooney*

Abstract planning and perceptual chunks: elements of expertise in geometry

*Kenneth R. Koedinger, John R. Anderson*

Combining social concepts: the role of causal reasoning

*Ziva Kunda, Dale T. Miller, Theresa Claire*

Modeling novice-to-expert shifts in problem solving strategy and knowledge organization

*Renée Elio, Peternela B. Scharf*

**Errata:** Algebra Mal-rules and cognitive accounts of error

*Stephen J. Payne, Helen R. Squibb*

**Author Index to Volume 14**

**Contents Index to Volume 14**

**Acknowledgement: Guest reviewers**

## Computational linguistics

**Vol. 16 No. 4**

**Articles**

Anaphora resolution in slot grammar

*Shalom Lappin, Michael McCord*

Sentential semantics for propositional attitudes

*Andrew R. Haas*

**Technical correspondence**

Parsing discontinuous constituents in dependency grammar

*Michael A. Covington*

**Letters to the editor**

**Book reviews**

A connectionist approach to word sense disambiguation

*Garrison W. Cottrell*

Artificial intelligence techniques in language learning

*Rex W. Last*

An introduction to Chinese, Japanese and Korean computing

*Jack K. T. Huang, Timothy D. Huang*

**Briefly noted**

**Books received**

**Abstracts of current literature**

## Decision support systems

**Vol. 7 No. 1**

**Articles**

Extending answers to neighbour entities in a cooperative answering context

*F. Cuppens, R. Demolombe*

Communication requirements and network evaluation within electronic meeting system environments

*A. R. Dennis, T. Abens, S. Ram, J. F. Nunamaker, Jr.*

A knowledge representation language for university requirements

*M. C. Golumbic, M. Markovich, M. Tiomkin*

Using harmonious houses for visual pairwise comparison of multiple criteria alternatives

*P. Korhonen*

Uncertainty techniques in expert system software

*W. G. W. Magill, S. A. Leech*

Integrating databases and preference evaluations in group decision support: a feedback-oriented approach

*R. Vetschera*

**Announcements**

**Calendar**

## Expert systems with applications

### Vol. 1 No. 4

**Special issue: Integration and competition of AI with quantitative methods for decision support**

#### Articles

##### Editorial

Integration and competition of AI with quantitative methods for decision support

*Jae K. Lee*

Integrating expert systems and operations research: a conceptual framework

*Efraim Turban, Robert Trippi*

Symbolic and numerical methods in hybrid multi-criteria decision support

*Lothar Winkelbauer, Steven Markstrom*

The design of an expert system for inventory control

*Nasir Ghiaseddin, Khalil Matta, Diptendu Sinha*

MAPNOS: Mathematical Programming Formulation Normalization System

Parallel model representations

*David A. Kendrick*

Integrating statistical and inductive learning methods for knowledge acquisition

*Ting-Peng Liang, John S. Chandler, Ingo Han*

A comparative study of recursive partitioning algorithm and analog concept learning system

*Sang Bin Lee, Seung Hyun Oh*

A neural network approach to the classification problem

*James W. Denton, Ming S. Hung, Barbara A. Osyk*

A comparison of methods for diagnostic decision making

*W. D. Potter, J. A. Miller, O. R. Weyrich*

##### NTIS section

**List of Contents and Author Index for Volume 1, 1990**

**Software survey section**

**New patents**

### Vol. 2 No. 1

**Special issue: The synergism of expert system and neural network technologies**

#### Articles

##### Editorial

The synergism of expert system and neural network technologies

*Larry R. Medsker*

Towards connectionist production systems

*Amrik S. Bhogal, Rudolph E. Seviara, Mohamed I. Elmasry*

Integration of adaptive machine learning and knowledge-based systems for routing and scheduling applications

*Nagesh Kadaba, Kendall E. Nygard, Paul L. Juell*

MOSAIC: A Macro-Connectionist Expert Systems Generator

*Khair Minh Pham, Patrice Degoulet*

Rule-based training of neural networks

*Stan C. Kwasny, Kanaan A. Faisal*

A neural network-based learning system for speech processing

*Mathew J. Palakal, Michael J. Zoran*

Expert systems for guiding backpropagation training of layered perceptrons

*Michael Lee Steib, Scott T. Weidman*

Knowledge processing with fuzzy cognitive maps

*Rod Taber*

##### NTIS section

**Software survey section**

**New patents**

### Vol. 2 Nos. 2/3

**Special section: Expert systems in emergency and crisis management**

**Guest editor's note**

*Richard G. Vedder*

#### Articles

The integrated southern pine beetle expert system:

*ISPBEEX*

*R. O. Flamm, R. N. Coulson, J. A. Jordan, M. E.*

*Sterle, H. N. Brodale, R. J. Mayer, F. L. Oliveria, D.*

*Drummond, P. J. Barry, K. M. Swain*

Disaster management with *NEGOPLAN*

*W. Michalowski, G. Kersten, Z. Koperczak, S.*

*Szpakowicz*

Decision making in complex environments under conditions of high cognitive loading: a personal expert systems approach

*Edgar C. Tacker, Manuel T. Silvia*

Expert systems to assist first responders to chemical emergencies

*Judith M. Hushon*

##### General articles

*EXACT: EXpert in analog circuit topology*

*Mojgan Samardar, Joseph H. Nevin, Lawrence J.*

*Mazlack*

*SIPDES: A Simulation Program Debugger Using an Expert System*

*Georgios I. Doukidis*

An expert system for determining government relocation allowances

*Hal Berghel, David Roach, Gary Green, Joe Meehan*

Developing knowledge-based systems: a survey of its impact on graduate MBAs

*Dorothy G. Dologite*

The application of deep models in industrial expert systems

*J. Cardenosa, F. Alonso, J. Castellanos, J. Garcia*

What kind of interface for expert systems?

*Marie-France Barthet, Chihab Hanachi*

An evaluation and selection methodology for expert system shells

*Louis A. Le Blanc, M. Tawfik Jelassi*

MEDIN: an expert system for processing medical insurance claims

*John J. Cierniakoski, Rahul De, Jerrold H. May*

Expert design systems for telecommunications

*Yuval Lirov, Benjamin Melamed*

##### NTIS section

**Software survey section**

**New patents**

## Expert systems

Vol. 8 No. 1

### Articles

Using existing knowledge sources (cases) to build an expert system

*Sanjay R. Chadha, Lawrence J. Mazlack, Roger Alan Pick*

Object-oriented representations, causal reasoning and expert systems

*Ajit Narayanan, Yuanping Jin*

IKOOPPS: an intelligent knowledge-based object-oriented process planning system for the manufacture of progressive dies

*Ivan Boon Hong Lee, Beng Siong Lim, Andrew Y. C. Nee*

### Interview

### Conference report

### Software reviews

### News

### Book reviews

### Diary

## Expert systems for information management

Vol. 3 No. 2

### Articles

ERSE: an expert retrieval system for electronic databases

*Peretz Shoval, Benjamin Arazi, Ehud Gudes, Dafna Efraim*

Library and information science professionals and knowledge engineering

*Anne Morris, Margaret O'Neill*

A knowledge-based computer system for assessing new company names

*Michael Niels Thorson, Rene Victor Valqui'vidal*

Hypertext: a new approach for implementing an expert system

*Gerri Peper, Connie Macintyre, Johan Keenan*

### Reviews

Expert systems for structural design

*H. Adeli, K. V. Balasurbramanyam*

Practical experience in building expert systems

*Max Bramer, ed.*

Expert systems: a decision support approach

*M. Klein, L. B. Methlie*

*Reviewed by Craig McDonald*

Knowledge acquisition-principles and guidelines

*K. L. McGraw, K. Harbison-Briggs*

On being a machine: Vol. 1. Formal aspects of artificial intelligence

*A. Narayanan*

Putting artificial intelligence to work—evaluating and implementing business applications

*S. Schoen, W. Sykes*

### Forthcoming conferences

## Human-computer interaction

Vol. 5 No. 4

### Articles

The cognitive consequences of object-oriented design

*Mary Beth Rosson, Sherman R. Alpert*

Effective feedback content for tutoring complex skills

*Jean McKendree*

The nature of device models: the yoked state space hypothesis and some experiments with text editors

*Stephen J. Payne, Helen R. Squibb, Andrew Howes*

### Acknowledgement to reviewers

### Author index for Volume 5, 1990

**IEEE expert****Vol. 6 No. 1****Articles**

Artificial life: a constructive lower bound for artificial intelligence

*Richard K. Belew*

Guest editor's introduction: the 1990 conference on AI applications

*Chris Tong*

Logos: a constraint-directed reasoning shell for operations management

*(Alex) Chao-Chiang Meng, Michael Sullivan*

Resource allocation in distributed factory scheduling

*Katia P. Sycara, Steven P. Roth, Norman Sadeh, Mark S. Fox*

Building a speech interface to a medical diagnostic system

*Smadar Shiffman, Alice W. Wu, Alex D. Poon, Christopher D. Lane, Blackford Middleton, Randolph A. Miller, Fred E. Masarie, Jr., Gregory F. Cooper, Edward H. Shortliffe, Lawrence M. Fagan*

**Interview****News****Products****Resources****Books**

Theories of comparative analysis

*Reviewed by Elisha Sacks*

Comparative analysis and qualitative reasoning: a response

*Daniel S. Weld*

Artificial intelligence, simulation, and modeling

*Reviewed by Leo Joskowicz*

**Calendar/Call for papers****Advertiser product index****Vol. 6 No. 2****Articles****Special feature**

The mathematical bases for qualitative reasoning

*Jayant Kalagnanam, Herbert A. Simon, Yumi Iwasaki*

**Functional reasoning & functional modeling**

Guest editor's introduction

*Jon Sticklen, William E. Bond*

Device representation: the significance of functional knowledge

*Anne M. Keuneke*

Device understanding and modeling for diagnosis

*Ameen Abu-Hanna, Richard Benjamins, Wouter Jansweijer*

Evaluating design using knowledge of purpose and knowledge of structure

*John A. Bradshaw, Richard M. Young*

Deriving and using descriptions of purpose

*David W. Franke*

**Object-oriented programming**

Using polymorphism to improve expert system maintainability

*John Yen, Hsiao-Lei Juang, Robert MacGregor*

Hierarchical modeling of the VLSI design process

*Amir Hekmatpour, Alex Orailoglu, Paul Chau*

**Special feature**

Knowledge compilation: a symposium

*Ashok K. Goel, Tom Bylander, B. Chandrasekaran, Thomas G. Dietterich, Richard M. Keller, Chris Tong*

**Letter to the editor****Forum****Product reviews****Product announcements****Book reviews****Mind bugs**

*Kurt Van Lehn*

**New books****Calendar/call for papers****Information and decision technologies****Vol. 17 No. 1****Articles**

A queuing network/branch-and-bound approach to lot scheduling in flexible manufacturing systems

*R. Conterno, A. Allasia, A. Proverbio*

Fast transient security assessment by pattern recognition

*G. Garcia, Ph. Desroches, J. Fantin*

A penalty function approach for mathematical programs with variational inequality constraints

*Patrick T. Harker, Seung-Chan Choi*

Manufacturing cells and part families: generalization of the GP method

*Jean Hilger, George Harhalakis, Jean-Marie Proth*

A note on a network model for nursing staff scheduling problems

*Zulfiqar Ali Khan*

A proposed structure for a hierarchical control system

*Fu Chunsheng, Liu Meng, Lu Jianzhong, Wang Shuqing, Wang Jicheng*

**Vol. 17 No. 2****Articles**

SAVE: A computer package for optimum choice of saving schemes

*A. Pouliezios*

Convolution algorithm for closed queuing network models of flexible manufacturing systems with limited buffers

*Li Zhuang, K. S. Hindi*

A theory of situation assessment for decision support

*Charles L. Smith, Sr., Andrew P. Sage*

Integration of modeling and AI techniques in KBDSS generators: the EDIPUSS system

*M. Milanese, A. Vicino, P. Borodani*

An interactive descriptive graphical approach to data analysis for trade-off decisions in multi-objective programming

*W. Y. Ng*

## Interacting with computers

**Vol. 3 No. 1**

**Articles**

**Editorial**

Importance of failure analysis for human-computer interface design

*T. T. Hewett*

Direct manipulation interaction tasks: a Macintosh-based analysis

*C. H. E. Phillips, M. D. Apperley*

Adaptive predictive text generation and the reactive keyboard

*J. J. Darragh, I. H. Witten*

Rapid prototyping in human-computer interface development

*H. R. Hartson, E. C. Smith*

Teaching the practitioners: developing a distance learning postgraduate HCI course

*J. Preece, L. Keller*

Rogierian psychology and human-computer interaction

*H. W. Killam*

## Interactive multimedia

**Vol. 2 No. 1**

**Articles**

**Aims and scope**

**Editorial**

**From the North American editor's desk**

Developing and using hypermedia resources

*John Northwood*

Interactive electronic books

*Philip Barker*

Palenque: a multimedia DVI prototype for children

*Kathleen S. Wilson*

Interactive expansion

*Jonathan Davis*

**Abstracts**

**Book reviews**

**Multimedia diary**

## International journal of man-machine studies

**Vol. 34 No. 2**

**Articles**

Computer supported cooperative work and groupware: an introduction to the special issues

*S. Greenberg*

Findings from observational studies of collaborative work

*J. C. Tang*

Twinkling lights and nested loops: distributed problem solving and spreadsheet development

*B. A. Nardi, J. R. Miller*

Design for conversation: lessons from Cognoter

*D. G. Tatar, G. Foster, D. G. Bobrow*

The Portland Experience: a report on a distributed research group

*M. H. Olson, S. A. Bly*

Power, ease of use and cooperative work in a practical multimedia message system

*N. S. Borenstein, C. A. Thyberg*

Electronic meeting support: the GroupSystems concept

*J. S. Valacich, A. R. Dennis, J. F. Nunamaker Jr*

Computer-mediated communication, deindividuation and group decision-making

*M. Lea, R. Spears*

Task and non-task functions of a computer conference used in professional education: a measure of flexibility

*J. Weedman*

**Vol. 34 No. 3**

**Articles**

Multidimensional audio window management

*M. Cohen, L. F. Ludwig*

Liveware: a new approach to sharing data in social networks

*I. H. Witten, H. W. Thimbleby, G. Coulouris, S. Greenberg*

rIBIS: a real-time group hypertext system

*G. L. Rein, C. A. Ellis*

Modelling groupware in the electronic office

*S. Cook, G. Birch, A. Murphy, J. Woolsey*

Post-mechanistic groupware primitives: rhythms, boundaries and containers

*P. Johnson-Lenz, T. Johnson-Lenz*

Structure and support in cooperative environments: the Amsterdam Conversation Environment

*E. A. Dykstra, R. P. Carasik*

Obstacles to user involvement in software product development, with implications for CSCW

*J. Grudin*

Cooperative prototyping: users and designers in mutual activity

*S. Bødker, K. Grønbaek*

## Journal of experimental & theoretical artificial intelligence

Vol. 3 No. 1

### Articles

Syntactical models of distributed cooperative systems

*Jozef Kelemen*

Cooperating/distributed grammar systems with hypothesis languages

*Jürgen Dassow*

Extending resolution to resolution logics

*Z. Stachniak*

Adaptive search through constraint violations

*Stellan Ohlsson, Ernest Rees*

Data modeling: a process for pattern induction

*Marsha Meredith*

Parallel optimization of tree structures for natural language parsing

*Geoffrey Sampson*

## Journal of intelligent and robotic systems

Vol. 4 No. 1

### Articles

Fuzzy logic-based formulation of the organizer of intelligent robotic systems

*H. M. Stellakis, K. P. Valavanis*

Multiple robot programming using a concurrent logic language

*David Ben-Arieh, Oded Maimon*

On the learning control of a robot manipulator

*D. M. Dawson, Z. Qu, J. F. Dorsey, F. L. Lewis*

An intelligent controller for process automation

*Vivek V. Badami, Paul Nielsen, James B. Comly*

A multilevel multilayer framework for manufacturing control

*Madan G. Singh, Khalil Hindi*

### Book review

Introduction to machine learning

*Y. Kodratoff*

### Calendar of events

## Journal of logic programming

Vol. 10 No. 2

### Articles

A practical framework for the abstract interpretation of logic programs

*Maurice Bruynooghe*

A type system for logic programs

*Eyal Yardeni, Ehud Shapiro*

And-parallel execution of logic programs on a shared-memory multiprocessor

*Yow-Jian Lin, Vipin Kumar*

## Knowledge-based systems

Vol. 4 No. 1

Special section: Knowledge-based software tools from the USSR

### Articles

#### Editorial

*E. Tyugu*

Knowledge-based programming environments

*E. Tyugu*

C-priz—a new generation software tool for small computers

*B. Volozh, M. Rosenfeld*

ExpertPriz—an integrated expert system shell

*M. Koov, H. Perkmann*

Frame-based implementation of a design knowledge-capture scheme

*J. A. Herndon, M. Anjanappa, D. K. Anand, J. A. Kirk*

Towards a fuzzy logic programming system: a fuzzy propositional logic

*P. C. Rhodes, S. M. Menani*

### Books

### Calendar

## Kybernetes

### Vol. 20 No. 1

#### Articles

#### Abstracts and keywords

#### Contemporary systems and cybernetics

Norbert Wiener (1894–1964): a discussion and review of a biography by Pesi R. Masani

*Alex Andrew*

Fuzzy matrix games considering the criteria of the players

*Lourdes Campos, Antonio Gonzalez*

A cybernetic approach to information systems and organisational learning

*J. D. R. de Raadt*

On additive systems

*Yi Lin*

#### Communications

Understanding ourselves and others: a systems view

*Brian H. Kleiner*

#### News, conferences and technical reports

#### Book reviews

#### Announcements

#### Special announcements

### Vol. 20 No. 2

#### Articles

#### Abstracts and keywords

#### Contemporary systems and cybernetics

Modern forms of alienation in high-complexity environments: a systems approach

*Felix Geyer*

A six-compartment model to study the kinetics of <sup>14</sup>C-labelled glucose

*Y. Cherruault, V. B. Sarin*

On the role of lag selection in minimum-relative-entropy spectral estimation

*Rallis C. Papademetriou*

AI and the eye—a discussion and review

*Frank George*

A topological approach to architectural design

*Wolf Pearlman*

#### Communications

DBMS metaphor for meta-information systems

*Z. Chen*

The status of requisite variety

*David Dewhurst*

#### News, conferences and technical reports

#### Book reviews

#### Announcements

#### Special announcements

## Methods of information in medicine

### Vol. 30 No. 1

#### Articles

#### Editorial—Chaos and biology

*G. Zajicek*

Extensions to time-oriented database model to support temporal reasoning in medical expert systems

*M. G. Kahn, L. M. Fagan, S. Tu*

Bayesian diagnostic probabilities without assuming independence of symptoms

*A. Gammermann, A. R. Thatcher*

Development of a scoring system to assist in the diagnosis of rheumatoid arthritis

*A. S. Rigby*

Morphosemantic analysis and translation of medical compound terms

*P. Dujols, P. Aubas, C. Baylon, F. Grémy*

On the optimization of cholesterol screening

*J. H. Milsum*

Affective state and voice: the specific properties of overtone distributions

*H. H. Stassen*

A local area network for medical research; planning, realization and experience

*R. Schosser, C. Weiss, K. Messmer*

Stanford AI in medicine workshop, March 1990

*J. Wyatt*

#### Calendar of events

#### Notes

#### Book reviews

## Pattern analysis and machine intelligence

Vol. 13 No. 1

### Articles

#### Computer vision and image analysis

On three-dimensional surface reconstruction methods

*R. M. Bolle, B. C. Vemuri*

Optimal morphological pattern restoration from noisy binary images

*D. Schonfeld, J. Goutsias*

Residual analysis for feature detection

*M. H. Chen, D. Lee, T. Pavlidis*

Robust contour decomposition using a constant curvature criterion

*D. M. Wuescher, K. L. Boyer*

### Correspondence

#### Computer vision and image analysis

Characterizing three-dimensional surface structures from visual images

*Y. F. Wang*

Estimation of three-dimensional motion of rigid objects from noisy observations

*J. Philip*

The perspective view of three points

*W. J. Wolfe, D. Mathis, C. Weber Sklair, M. Magee*

Trinocular stereo vision for robotics

*N. Ayache, F. Lustman*

Shape representation by multiscale contour approximation

*A. Bengtsson, J. O. Eklundh*

### IEEE copyright information

Vol. 13 No. 2

### Articles

#### Editor's notice

*A. K. Jain*

#### Computer vision and image analysis

Multiple resolution segmentation of textured images

*C. Bouman, B. Liu*

CAD-based computer vision: from CAD models to relational graphs

*P. J. Flynn, A. K. Jain*

A theory of photometric stereo for a class of diffuse non-Lambertian surfaces

*H. D. Tagare, R. J. P. deFigueiredo*

Decomposition of convex polygonal morphological structuring elements into neighbourhood subsets

*J. Xu*

### Pattern classification

An iterative growing and pruning algorithm for classification tree design

*S. B. Gelfand, C. S. Ravishankar, E. J. Delp*

Clustering without a metric

*G. Matthews, J. Hearne*

### Correspondence

#### Computer vision and image analysis

Inverse perspective transform using zero-curvature contour points: application to the localization of some generalized cylinders from a single view

*M. Richetin, M. Dhome, J. T. Lapresté, G. Rives*

Classification of rotated and scaled textured images using Gaussian Markov random field models

*F. S. Cohen, Z. Fan, M. A. Patel*

Fast image labeling using local operators on mesh-connected computers

*H. M. Alnuweiri, V. K. Prasanna Kumar*

## Pattern recognition letters

Vol. 12 No. 1

### Articles

Elliptic fit of objects in two and three dimensions by moment of inertia optimization

*B. B. Chaudhuri, G. P. Samanta*

Symmetry analysis of line drawings using the Hough transform

*H. Ogawa*

Transition region determination based thresholding

*Y. J. Zhang, J. J. Gerbrands*

Contour detection by using information theory of deterministic functions

*G. Jumarie*

Reconstructing partially occluded object boundaries

*D. P. Illing, P. T. Fairney*

It can be done without camera calibration

*R. Mohr, E. Arbogast*

Pose verification as an optimal assignment problem

*S. M. Bhandarkar, M. Suk*

Detecting clouds and cloud shadows on aerial photographs

*C. Wang, L. Huang, A. Rosenfeld*

### Erratum

#### Call for papers

Vol. 12 No. 2

### Articles

An efficient image compression algorithm without distortion

*L. Huang, A. Bijaoui*

Parallel algorithms for testing if a point is inside a closed curve

*L. T. Chen, L. S. Davis*

A comparison of splitting methods for the identification of corner-points

*R. Espelid, I. Jonassen*

Minimizing the cost of errors with a Markov random field

*D. B. Sher*

Comments on grey-level thresholding of images using a correlation criterion

*A. D. Brink*

Recognition and positioning of partially occluded 3-D objects

*K. S. Ray, D. Dutta Majumder*

Fold principal axis—a new tool for defining the orientations of rotationally symmetric shapes

*S.-L. Chou, J.-C. Lin, W.-H. Tsai*

An efficient transportation algorithm for automatic chromosome karyotyping

*M. Tso, P. Kleinschmidt, I. Mitterreiter, J. Graham*

A generalized discriminant hyperplane pairs approach to pattern classification

*B. V. Dasarathy*

Answer to Professor Dasarathy about "Two classes linear discrimination. A min-max approach"

*P. Castagliola, B. Dubuisson*
