Special volume: Knowledge representation

Articles

Introduction to the special volume on knowledge representation

R. J. Brachman, H. J. Levesque and R. Reiter

Nonmonotonic reasoning in the framework of situation calculus

A. B. Baker

The computational complexity of abduction

T. Bylander, D. Allemang, M. C. Tanner and J. R. Josephson

Temporal constraint networks

R. Dechter, I. Meiri and J. Pearl

Impediments to universal preference-based default theories

J. Doyle and M. P. Wellman

Embedding decision-analytic control in a learning architecture

O. Etzioni

The substitutional framework for sorted deduction: fundamental results on hybrid reasoning

A. M. Frisch

Existence assumptions in knowledge representation

G. Hirst

Hard problems for simple default logics

H. A. Kautz and B. Selman

The effect of knowledge on belief: Conditioning, specificity and the lottery paradox in default reasoning

D. Poole

Three-valued nonmonotonic formalisms and semantics of logic programs

T. Przymusiński

On the applicability of nonmonotonic logic to formal reasoning in continuous time

M. Rayner

Principles of metareasoning

S. Russell and E. Wefald

Author index

Vol. 50 No. 1

Articles

Learning structures of visual patterns from single instances

Y. Suganuma

Incremental interpretation

F. C. N. Pereira and M. E. Pollack

Initialization for the method of conditioning in Bayesian belief networks (research note)

H. J. Suermondt and G. F. Cooper

Finding optimal derivation strategies in redundant knowledge bases (research note)

R. Greiner

Book review of *Learning Search Control Knowledge: An Explanation-Based Approach* (Steve Minton)

G. DeJong and J. Gratch

Letters to the editor

Compulsory reduction in linear derivation systems (letter to the editor)

G. Sutcliffe

Announcements

Forthcoming papers

Vol. 50 No. 2

Articles

Reduction rules for resolution-based systems

N. Eisinger, H. J. Ohlbach and A. Präcklein

Cumulative default logic: In defense of nonmonotonic inference rules

G. Brewka

Reducing reexpansions in iterative-deepening search by controlling cutoff bounds (research note)

U. K. Sarkar, P. P. Chakrabarti, S. Ghose and S. C. De Sarkar

Epistemic entrenchment and possibilistic logic (research note)

D. Dubois and H. Prade

Book review of *The Invention of Memory: A New View to the Brain* (Israel Rosenfield)

W. J. Clancey

Announcement

Forthcoming papers

Vol. 50 No. 3

Articles

A general framework for reason maintenance

D. McDermott

Maintaining mental models of agents who have existential misconceptions

A. S. Maida

Generalizing the notion of schema in genetic algorithms (research note)

M. D. Vose

Forthcoming papers

Articles

Guest editor's introduction

Saul Amarel

Knowledge-based systems: An overview

William S. Mark and Robert L. Simpson, Jr.

Pilot's associate: A cooperative, knowledge-based system application

Sheila B. Banks and Carl S. Lizza

Frameworks for developing intelligent systems: The ABE systems engineering environment

Frederick Hayes-Roth, James E. Davidson, Lee D. Erman and Jay S. Lark

Using a description classifier to enhance knowledge representation

Robert MacGregor and Mark H. Burstein

Explanations in knowledge systems: The role of explicit representation of design knowledge

B. Chandrasekaran and William Swartout

The roles of the task structure and domain functional models

Michael C. Tanner and Anne M. Keuneke

Design for explainable expert systems

William Swartout, Cécile Paris and Johanna Moore

Process monitoring and diagnosis: A model-based approach

Daniel Dvorak and Benjamin Kuipers

Real-time fault diagnostics

Samir Padalkar, Gabor Karsai, Csaba Biegl, Janos Sztipanovits, Koji Okuda and Nobuji Miyasaka

Pattern analysis and machine intelligence

Vol. 13 No. 3

Articles

Computer vision and image analysis

An efficiently computable metric for comparing polygonal shapes

E. M. Arkin, L. P. Chew, D. P. Huttenlocher, K. Kedem and J. S. B. Mitchell

Out-of-roundness problem revisited

V. B. Le and D. T. Lee

3-D object recognition using bipartite matching embedded in discrete relaxation

W. Y. Kim and A. C. Kak

Pattern classification

Small sample size effects in statistical pattern recognition: Recommendations for practitioners

S. J. Raudys and A. K. Jain

Synthesis of statistical knowledge from time-dependent data

D. K. Y. Chiu, A. K. C. Wong and K. C. C. Chan

Correspondence

Recursive regularization filters: Design, properties, and applications

M. Unser, A. Aldroubi and M. Eden

Fast B-spline transforms for continuous image representation and interpolation

M. Unser, A. Aldroubi and M. Eden

Pattern classification

Small sample error rate estimation for k -NN classifiers

S. M. Weiss

Neurocomputations in relational systems

W. Pedrycz

Text processing

Signal-to-string conversion based on high likelihood regions using embedded dynamic programming

Y. Gong and J.-P. Haton

Vol. 13 No. 5

Articles

Computer vision and image analysis

Parallel and deterministic algorithms from MRF's: Surface reconstruction

D. Geiger and F. Girosi

Image restoration using Gibbs priors: Boundary modeling, treatment of blurring, and selection of hyperparameter

V. E. Johnson, W. H. Wong, X. Hu and C.-T. Chen

Image filtering using multiresolution representations

S. Ranganath

Fitting parameterized three-dimensional models to images

D. G. Lowe

Parallel processing

The Warp machine on Navlab

J. D. Crisman and J. A. Webb

Search techniques

Single-agent parallel window search

C. Powley and R. E. Korf

Correspondence

Computer vision and image analysis

Unsupervised texture-segmentation using Markov random field models

B. S. Manjunath and R. Chellappa

Optimal edge detectors for ramp edges

M. Petrou and J. Kittler

Positioning quadric surfaces in an active stereo imaging system

J. H. Nurre and E. L. Hall

Vol. 13 No. 6

Articles

Computer vision and image analysis

Estimating the kinematics and structure of a rigid object from a sequence of monocular images

T. Broda and R. Chellappa

Adaptive smoothing: A general tool for early vision

P. Saint-Marc, J.-S. Chen and G. Medioni

Pose determination from line-to-plane correspondences: Existence condition and closed-form solutions

H. H. Chen

Efficiently computing and representing aspect graphs of polyhedral objects

Z. Gigus, J. Canny and R. Seidel

Pattern classification

Robust classifiers by mixed adaptation

D. Gutfinger and J. Sklansky

Morphology

Theoretical aspects of gray-level morphology

H. J. A. M. Heijmans

Watersheds in digital spaces: An efficient algorithm based on immersion simulations

L. Vincent and P. Soille

Correspondence

Probabilistic reasoning

Calculating Dempster-Shafer plausibility

J. A. Barnett

Computational geometry

On navigating between friends and foes

N. Kiryati and A. M. Bruckstein

Information and decision technologies

Vol. 17 No. 1

Articles

A queueing network/branch-and-bound approach to lot scheduling in flexible manufacturing systems

R. Conterno, A. Allasia and A. Proverbio

Fast transient security assessment by pattern recognition

G. Garcia, Ph. Desroches and J. Fantin

A penalty function approach for mathematical programs with variational inequality constraints

Patrick T. Harker and Seung-Chan Choi

Manufacturing cells and part families: Generalization of the GP method

Jean Hilger, George Harhalakis and Jean-Marie Proth

A note on a network model for nursing staff scheduling problems

Zulfiqar Ali Khan

A proposed structure for a hierarchical control system

Fu Chunsheng, Liu Meng, Lu Jianzhong, Wang Shuqing and Wang Jicheng

Vol. 17 No. 2

Articles

SAVE: A computer package for optimum choice of saving schemes

A. Pouliezios

Convolution algorithm for closed queueing network models of flexible manufacturing systems with limited buffers

Li Zhuang and K. S. Hindi

A theory of situation assessment for decision support

Charles L. Smith, Sr. and Andrew P. Sage

Integration of modeling and AI techniques in KBDSS generators: The EDIPUSS system

M. Milanese, A. Vicino and P. Borodani

An interactive descriptive graphical approach to data analysis for trade-off decisions in multi-objective programming

W. Y. Ng

Vol. 17 No. 3

Articles

Model reference adaptive control algorithms for decentralized systems

H. Yousef and M. Simaan

Probabilistic assessment of hydrothermal unit commitment

S. K. Tong and S. M. Shahidehpour

A review of artificial intelligence-based job-shop scheduling systems

O. Charalambous and K. S. Hindi

Large-scale recruitment under budgetary and labor constraints

Thomas J. Bergmann and G. E. Martin

A new method of extend perturbation analysis

C. Q. Jiang, M. G. Singh and K. S. Hindi

Interacting with computers

Vol. 3 No. 2

Articles

IMAGES: A user interface development system

J. Alves Marques, N. Guimaraes and L. Pinto Simoes

Users, a software usability model and product evaluation

R. Holcomb and A. L. Tharp

Interactive modelling in decision support systems

M. R. Jones

Visual simulation as an aid to understanding computer functions

I. V. Eriksson, A. E. Finnas and P. Reijonen

Observations and inventions: new approaches to the study of human-computer interaction

A. F. Monk and P. C. Wright

Visual guidance for information navigation: A computer-human interface design principle derived from cognitive neuroscience

G. W. Strong and K. E. O'Neill Strong

Report on the INTERACT '90 Workshop on Education in HCI: Transcending disciplinary and national boundaries

M. Mantei, T. Hewett, K. Eason and J. Preece

Interactive multimedia

Vol. 2 No. 2

Articles

Aims and scope

Editorial

Searching pictorial databases by means of depictions

S. Charles and S. Scrivener

Delivering health and safety training on interactive CD-ROM: A case study

J. C. Davis

Multimedia for library staff training: A preliminary report of research

Potentials, valleys, and dynamic global coverings

Chantal David and Steve W. Zucker

The feasibility of motion and structure from noisy time-varying image velocity information

John L. Barron, Allan D. Jepson and John K.

Tsotsos

Bayesian modeling of uncertainty in low-level vision

Richard Szeliski

Reading cursive handwriting by alignment of letter prototypes

Shimon Edelman, Shimon Ullman and Tamar Flash

Vol. 6 No. 1

Articles

Color constancy from mutual reflection

Brian V. Funt, Mark S. Drew and Jian Ho

Determining optical flow for irregular domains by minimizing quadratic functionals of a certain class

C. Schnörr

A cost-benefit analysis of a third camera for stereo correspondence

Umesh R. Dhond and J. K. Aggarwal

Robust regression methods for computer vision: A review

Peter Meer, Doron Mintz, Dong Yoon Kim and Azriel Rosenfeld

Vol. 6 No. 2

Articles

Uniqueness in shape from shading

J. Oliensis

Asymptotic Bayesian surface estimation using an image sequence

Yi-Ping Hung, David B. Cooper and Bruno

Cernuschi-Frias

Computing optical flow across multiple scales: An adaptive coarse-to-fine strategy

Roberto Battiti, Edoardo Amaldi and Christof Koch

Emulating the human interpretation of line-drawings as three-dimensional objects

Thomas Marill

International journal of man-machine studies

Vol. 34 No. 4

Articles

The use of command language grammar in a design tool

C. Firth and R. C. Thomas

Natural-language generation—an overview

A. Mykowiecka

An experiment in modeling human visual learning

B. Zak, J. Carroll and K. Swigger

How to get people to say and type what computers can understand

E. Zoltan-Ford

Knowledge representation and control in "gm 1", and automated DNA sequence analysis system based on the MGR architecture

C. A. Fields, H. D. Pfeiffer and T. C. Eskridge

Text planning—how to make computers talk in natural-language

A. Mykowiecka

High precision touchscreens: Design strategies and comparisons with a mouse

A. Sears and B. Shneiderman

Vol. 34 No. 5

Articles

The design of a memory efficient Palantype Transcription System

R. Dye, J. L. Arnott and A. F. Newell

Integrating methods of human-computer interface design with structured systems development

A. G. Sutcliffe and M. McDermott

The importance of rough approximations for information retrieval

P. Srinivasan

An experience in knowledge acquisition for expert control of industrial processes

S. Parthasarathy

Animated demonstrations vs written instructions for learning procedural tasks: A preliminary investigation

S. Palminter, J. Alkerton and P. Baggett

Another approach to formalizing the point and interval calculi

E. Hajnicz

A formalization of absolute and relative dates based on the point calculus

E. Hajnicz

The impact of experience on the design of user interface

A. R. Montazemi

Vol. 34 No. 6

Articles

Editorial

Reasoning with cases and hypotheticals in HYPO

K. D. Ashley

Building explanations from rules and structured cases

L. K. Branting

CABARET: Rule interpretation in a hybrid architecture

E. L. Rissland and D. B. Skalak

Vol. 35 No. 1

Articles

A connectionist and symbolic hybrid for improving legal research

Tanneguy Redarce, Yves Lucas, Maurice Betemps and Alain Jutard

Integration control and failure detection with application to the robot payload variation problem

K. P. Valavanis, C. A. Jacobson and B. H. Gold

Energy analysis of robot task motions

Oded Maimon, Eli Profeta and Sigmond Singer

Calendar of events

The journal of logic programming

Vol. 10 Nos. 3/4

Articles

Database logic programming

Moshe Y. Vardi

Set constructors in a logic database language

Catriel Beeri, Shamim Naqvi, Oded Shmueli and Shalom Tsur

A simple characterization of uniform boundedness for a class of recursions

Jeffrey F. Naughton and Yehoshua Sagiv

On the power of magic

Catriel Beeri and Raghuram Ramakrishnan

Efficient evaluation for a subset of recursive queries

Gösta Grahne, Seppo Sippu and Eljas Soisalon-Soininen

Comparison of methods for logic-query implementation

Alberto Marchetti-Spaccamela, Antonella Pelaggi and Domenico Saccà

Vol. 11 No. 1

Articles

Automated theorem proving and logic programming: A natural symbiosis

Larry Wos and William McCune

The reduce-or process model for parallel execution of logic programs

Laxmikant V. Kalé

Comments on "Logic-programming with equations"

Pier Giorgio Bosco, Elio Giovannetti, Corrado

Moiso and Catuscia Palamidessi

Vol. 11 No. 2

Articles

Bilattices and the semantics of logic programming

Melvin Fitting

A linear control algorithm for a class of rule-based systems

Malik Ghallab and Gonzalo Escalada-Imaz

Memory- and buffer-referencing characteristics of a WAM-based Prolog

Evan Tick

On derived dependencies and connected databases

Philip W. Dart

Knowledge acquisition

Vol. 3 No. 1

Articles

Structured matching: A task-specific technique for making decisions

T. Bylander, T. R. Johnson and A. Goel

Methodological foundations of KEATS, the knowledge engineer's assistant

E. Motta, T. Rajan, J. Domingue and M. Eisenstadt

Knowledge acquisition techniques for decision analysis using AXOTL and AQUINAS

J. M. Bradshaw, S. P. Covington, P. J. Russo and J. H. Boose

A framework for constructing visual knowledge specifications in acquiring organizational knowledge

J. P. Davis and R. D. Bonnell

Vol. 3 No. 2

Articles

Usable and reusable programming constructs

G. Klinker, C. Bhola, G. Dallemagne, D. Marques and J. McDermott

Underlying assumptions of knowledge acquisition and machine learning

K. Morik

Detecting and correcting errors in rule-based expert systems: An integration of empirical and explanation-based learning

M. J. Pazzani and C. A. Brunk

Expert critics: Operationalizing the judgement/decisionmaking literature as a theory of "bugs" and repair strategies

B. G. Silverman

ICONKAT: An integrated constructivist knowledge acquisition tool

K. Ford, A. Cañas, J. Jones, H. Stahl, J. Novak and J. Adams-Weber

Knowledge-based systems

Vol. 4 No. 2

Articles

Reappraisal of the use of conditional probability in early expert systems

P. C. Rhodes and G. R. Garside

Strategies for mixed reasoning with a graph-based reasoning engine

B. J. Garner and E. Tsui

Rule by example: an example-based approach to knowledge-base management

L. V. Orman

Model-theoretic approach to clustering

V. Sridhar and M. Narasimha Murty

Knowledge-based system for material selection for design with new materials

H.-J. Bullinger, J. Warschat and D. Fischer

Logic-based approach to expert systems in chemistry

T. Akutsu, E. Suzuki and S. Ohsuga

Articles

ALFS: An inductive learning algorithm

Krzysztof J. Cios and Ian Moraes

Modelling continuous and intermittent cranking motions

Abdul Raouf, Hirofumi Imanishi and Kozi Morooka

Elements of morphogenesis and pattern recognition methods in the process of engineering creation

F. W. Przystupa

Towards a general theory of pattern recognition

Brennig James

A mathematical proof of the definition of the science of science

Yi Lin and Yonghao Ma

Some observations on cybernetics

Masnikosa Vukašin and Ušćumlić Momčilo

News, conferences and technical reports

Book reviews

Announcements

Special announcements

Pattern recognition letters

Vol. 12 No. 3

Articles

Adaptive pattern recognition using goal seeking neurons

E. C. D. B. C. Filho, M. C. Fairhurst and D. L. Bisset

Counting thin and bushy triangulations of convex polygons

S. Chattopadhyay and P. P. Das

A counterexample to a dynamic algorithm for convex hulls of line arrangements

B. Bhattacharya, H. Everett and G. Toussaint

On representation of a shape's skeleton

A. Sirjani and G. R. Cross

Improving edge measurement on noisy images by hierarchical neural networks

S. Lu and A. Szeto

Volume intersection with optimal set of directions

K. Shanmukh and A. K. Pujari

Generalizing the aspect graph concept to include articulated assemblies

M. Sallam and K. Bowyer

Motion analysis using the novelty filter

E. Ardizzone, A. Chella, S. Gaglio and F. Sorbello

Field theory approach for determining optical flow

A. Nomura, H. Miike and K. Koga

Announcement 11th IAPR conference

Vol. 12 No. 4

Articles

A probabilistic approach to clustering

V. L. Brailovsky

A cluster detection algorithm based on percolation theory

C. Gotsman

On the use of time varying shading and surface rim irradiance

J. Arnspang

Fundamentals of texture flow equations in vision calculus

J. Arnspang

Automatic threshold selection using histograms based on the count of 4-connected regions

H. Luijendijk

A new approach to polygonal approximation

B. K. Ray and K. S. Ray

A parallel algorithm for decomposition of binary objects through skeletonization

S. K. Parui and A. Datta

Variable-resolution character thinning

X. Li and A. Basu

Symmetry-based recognition of vehicle rears

A. Kuehnle

User modeling and user-adapted interaction

Vol. 1 No. 1

Preface by Alfred Kobsa

User modelling and user adapted interaction in an intelligent tutoring system

Hyacinth S. Nwana

Beliefs, stereotypes and dynamic agent modeling

Afzal Ballim and Yorick Wilks

Conversation with and through computers

Susan E. Brennan

Revising deductive knowledge and stereotypical knowledge in a student model

Xueming Huang, Gordon I. McCalla, Jim E. Greer and Eric Neufeld

Instructions for authors

Referees for *The Knowledge Engineering Review* Papers – Volume 6

R.M. Burstall, University of Edinburgh, UK
B. Chandrasekaran, Ohio State University, USA
Bill Clancey, Institute for Research on Learning, USA
Dominic Clark, Imperial Cancer Research Fund, UK
Steve Draper, University of Glasgow, UK
Colin Gordon, Imperial Cancer Research Fund, UK
Ross King, University of Strathclyde, UK
Alfred Kobsa, University of Saarbruecken, Germany
Paul Krause, Imperial Cancer Research Fund, UK
Ian Neale, City University, UK
Mike O’Neil, Imperial Cancer Research Fund, UK
Larry Rendell, University of Illinois at Urbana-Champaign, USA
Nigel Shadbolt, University of Nottingham, UK
R. Wielinga, University of Amsterdam, The Netherlands

SECOND INTERNATIONAL CONFERENCE
ON ARTIFICIAL INTELLIGENCE IN DESIGN

22-25 JUNE 1992, CARNEGIE MELLON UNIVERSITY, PITTSBURGH, USA

This international conference series has been established to provide a forum for the presentation and discussion of the state-of-the-art and cutting edge research and development results in artificial intelligence in design. The first conference was held in Edinburgh in June 1991 and attracted papers and attendees from 21 countries. For further information please contact:

Fay Sudweeks
Conference Organiser, AI in Design '92
Key Centre of Design Quality
University of Sydney NSW 2006 Australia
Tel: +61-2-692 2328 Fax: +61-2-692 3031
Email: aid92@key.arch.su.oz.au
