

DATA & KNOWLEDGE ENGINEERING

Editor-in-Chief: Peter Chen, Department of Computer Science, Louisiana State University, Baton Rouge, LA 70803-4020, USA,

Associate Editor: Reind van de Riet, Department of Mathematics and Computer Science, Free University, 1081 HV Amsterdam, The Netherlands,

Technical Area Advisory Editor for Data Engineering, Distributed Databases: Wesley Chu, Department of Computer Science, University of California, Los Angeles, CA, 90024, USA

Technical Area Advisory Editor for Data Engineering, Database Design: Jane Liu, Department of Computer Science, University of Illinois, 1304 Spring Ave., Urbana, IL, 61801, USA

Technical Area Advisory Editor for Knowledge Engineering: Donald Walker, Bell Communications Research, 445 South Street, Morristown, NJ, 07960, USA

AIMS AND SCOPE

DKE covers the following topics: **Representation and Manipulation of Data & Knowledge** Conceptual data models. Knowledge representation techniques. Data/knowledge manipulation languages and techniques. **Architectures** New architectures for database/knowledgebase/expert systems. Design and implementation techniques. Languages and user interfaces.

The knowledge engineering review

Notes for Contributors

Contributions for publication should be addressed to Dr John Fox, Editor, The Knowledge Engineering Review, Biomedical Computing Unit, PO Box 123, Lincoln's Inn Fields, London WC2A 3PX, England, Dr Peter Jackson, North American Editor, McDonnell-Douglas Research Lab, Artificial Intelligence Group, PO Box 516, St Louis, MO 63166, USA, or may be submitted through a member of the Editorial Advisory Board (addresses inside front cover). Submission implies that the manuscript has not been published previously nor currently submitted for publication elsewhere.

All contributions, whether articles, correspondence or reviews, must be sent in triplicate and typed on one side of the paper, with wide margins and double-line spacing throughout. Any minor corrections should be made neatly in the typescript, leaving the margins clear. The author is invited to nominate up to five possible referees, who will not necessarily be used.

Articles must be accompanied by a brief, informative rather than indicative, abstract. Headings should be set out clearly but not underlined. Primary headings should be in lower case, at margin, with arabic numeral; subheadings should be numbered 2.a., 2.b., etc., and tertiary headings, 2.a.1., 2.a.2. No cross-references should be given by page number, but 'above' and 'below' should be used with the section specified, e.g. Section 2.a.2. The SI system of units should be used. The author should mark in the margin of the manuscript where figures and tables may be inserted. References to points in larger works should, where possible, quote the page reference, e.g. Ager, 1981, p. 102.

Tables should be typed with double-line spacing on sheets separate from the running text. Each table must have a caption that will make the data in the table intelligible without reference to the text.

Illustrations should be drafted for reproduction as full page (148 mm) width. Originals should normally be drawn at twice final area and must be sent in a flat package; larger drawings may delay publication. Lettering should be of a size so that when reduced the smallest lower-case letters will not be less than about 1 mm. Avoid gross disparities in lettering size on a drawing. Duplicates of illustrations should be sent, and may be prints or, preferably, photocopies reduced to final size. Illustrations in the text, both line drawings and photographs for halftone reproductions, will be referred to as figures (Fig. 2, 2a, etc.). Folding plates will not be accepted. Figures composed of photographs should be glossy prints presented at publication scale. Figure captions must be typed with double-line spacing on sheets separate from the running text.

The accuracy of references is the responsibility of authors. References must be double-spaced and spelt out in full, e.g.

Gale, W A, ed 1986. *Artificial Intelligence and statistics*, Reading, Massachusetts: Addison-Wesley

Pearl, J 1984. *Heuristics. Intelligent search strategies for problem solving*, Reading, Massachusetts: Addison-Wesley

Tie-Cheng Wang and Bledsoe, W W, 1987. "Hierarchical deduction" *Journal of Automated Reasoning* 3 (1) pp1-34.

Pau, L F, 1986. "Survey of expert systems for fault detection, test generation and maintenance" *Expert Systems*, 3 (2) pp 100-111.

Twenty Five offprints of each paper will be provided free of charge. Additional offprints may be purchased according to a set scale of charges if ordered when the proofs are returned.

The knowledge engineering review

VOLUME 7 NUMBER 1 MARCH 1992

Contents

Qualitative reasoning over time: history and current prospects LOUISE TRAVÉ-MASSUYÈS	1
Qualitative frameworks for decision support: lessons from medicine JOHN FOX and PAUL KRAUSE	19
From knowledge bases to decision models MICHAEL P. WELLMAN, JOHN S. BREESE and ROBERT P. GOLDMAN	35
The qualitative representation of physical systems ENRICO COIERA	55
Book reviews	79
From the journals	85
