INCREASED EXTENT IN '94!

Knowledge-Based SYSTEMS

Quarterly

ISSN 0950-7051

Knowledge-Based Systems is the international interdisciplinary and applications-oriented journal on knowledge-based systems.

FOCUS: systems that use knowledge-based techniques to support human decision-making, learning and action

ISSUES: the quality of support given and the manner of its presentation

EMPHASIS: the practical significance of such systems in modern computer development and usage

SUBJECTS COVERED:

- the implementation of knowledge-based systems
- the design process
- the matching of needs to delivered systems
- organizational implications of the introduction of such technology
- expert systems
- application of knowledge-based methods
- integration with conventional technologies
- software tools for KBS construction
- decision-support mechanisms
- user interactions
- knowledge acquisition
- knowledge representation
- languages and programming environments
- knowledge-based implementation techniques
- system architectures

Now including **KNOWLEDGE-BASED SYSTEMS LETTERS** – short contributions announcing significant new results: their rapid publication ensures that subscribers are kept totally up-to-date with current developments.

◆ AIMS AND SCOPE

Database Systems and Knowledgebase Systems share many common principles. *Data & Knowledge Engineering (DKE)* stimulates the exchange of ideas and interaction between these two related fields of interest. *DKE* reaches a world-wide audience of researchers, designers, managers and users. The major aim of the journal is to identify, investigate and analyze the underlying principles in the design and effective use of these systems.

DKE achieves this aim by publishing original research results, technical advances and news items concerning data engineering, knowledge engineering, and the interface of these two fields.

DKE covers the following topics:

Representation and Manipulation of Data & Knowledge: Conceptual data models. Knowledge representation techniques. Data/knowledge manipulation languages and techniques.

Architectures: New architectures for database / knowledgebase / expert systems. Design and implementation techniques. Languages and user interfaces. Distributed architectures.

Construction: Data / knowledgebase design methodologies and tools. Data / knowledge acquisition methods. Integrity / security / maintenance issues.

Applications, Case Studies, Management Issues: Data administration issues. Knowledge engineering practice. Office and engineering applications.

Plus... conference reports, calendar of events, book reviews etc.

Non VAT registered customers in the European Union should add the appropriate VAT rate applicable in their country to the price. The Dutch Guilder (Dfl.) price quoted applies worldwide, except in the Americas (North, Central and South America). The US Dollar (US \$) price quoted applies in the Americas only.

Journals are sent by surface mail to all countries, except the following, where air delivery via SAL mail is ensured at no extra cost to the subscriber: Argentina, Australia, Brazil, Canada, Hong Kong, India, Israel, Japan, Malaysia, Mexico, New Zealand, Pakistan, P.R. of China, Singapore, South Africa, South Korea, Taiwan, Thailand and USA

A major forum focusing on decision research...

JOURNAL OF BEHAVIORAL DECISION MAKING

EDITOR

GEORGE WRIGHT
Strathclyde Graduate
Business School,
University of
Strathclyde,
UK

ASSOCIATE EDITOR

J. FRANK YATES
University of Michigan,
USA

The Journal of Behavioral Decision Making is a multidisciplinary journal with a broad base of content and style. The objective of the Journal is to present and stimulate behavioral research on decision making and to provide a forum for the evaluation of complementary, contrasting and conflicting perspectives. These perspectives include: psychology, management science, sociology, political science and behavioral economics.

Papers published in the Journal encompass, but are not limited to, the following areas:

- ▶ Individual decision making
- ▶ Management science and decision aids
- ▶ Interpersonal and small group decision making
- ▶ Organizational decision making
- ▶ Strategic decision making
- ▶ Social and political structuring of decision making
- ▶ Behavioral economics
- ▶ Expert systems
- ▶ Consumer decision making
- ▶ Behavioral accounting
- ▶ Medical and clinical decision making

The knowledge engineering review

Notes for Contributors

Contributions for publication should be addressed to Dr John Fox, Editor, The Knowledge Engineering Review, Biomedical Computing Unit, PO Box 123, Lincoln's Inn Fields, London WC2A 3PX, England, Dr Peter Jackson, North American Editor, Department of Electrical and Computer Engineering, Clarkson University, Potsdam, NY 13699-5720, USA; or may be submitted through a member of the Editorial Advisory Board (address inside front cover). Submission implies that the manuscript has not been published previously nor currently submitted for publication elsewhere.

All contributions, whether articles, correspondence or reviews, must be sent in triplicate and typed on one side of the paper, with wide margins and double-line spacing throughout. Any minor corrections should be made neatly in the typescript, leaving the margins clear. The author is invited to nominate up to five possible referees, who will not necessarily be used.

Articles must be accompanied by a brief, informative rather than indicative, abstract. Headings should be set out clearly but not underlined. Primary headings should be in lower case, at margin, with arabic numeral; subheadings should be numbered 2.a., 2.b., etc., and tertiary headings, 2.a.1., 2.a.2. No cross-references should be given by page number, but 'above' and 'below' should be used with the section specified, e.g. Section 2.a.2. The SI system of units should be used. The author should mark in the margin of the manuscript where figures and tables may be inserted. References to points in larger works should, where possible, quote the page reference, e.g. Ager, 1981, p. 102.

Tables should be typed with double-line spacing on sheets separate from the running text. Each table must have a caption that will make the data in the table intelligible without reference to the text.

Illustrations should be drafted for reproduction as full page (148 mm) width. Originals should normally be drawn at twice final area and must be sent in a flat package; larger drawings may delay publication. Lettering should be of a size so that when reduced the smallest lower-case letters will not be less than about 1 mm. Avoid gross disparities in lettering size on a drawing. Duplicates of illustrations should be sent, and may be prints or, preferably, photocopies reduced to final size. Illustrations in the text, both line drawings and photographs for halftone reproductions, will be referred to as figures (Fig. 2, 2a, etc.). Folding plates will not be accepted. Figures composed of photographs should be glossy prints presented at publication scale. Figure captions must be typed with double-line spacing on sheets separate from the running text.

The accuracy of references is the responsibility of authors. References must be double-spaced and spelt out in full, e.g.

Gale, W A, ed 1986. *Artificial Intelligence and statistics*, Reading, Massachusetts: Addison-Wesley

Pearl, J 1984. *Heuristics. Intelligent search strategies for problem solving*, Reading, Massachusetts: Addison-Wesley

Tie-Cheng Wang and Bledsoe, W W, 1987. "Hierarchical deduction" *Journal of Automated Reasoning* 3 (1) pp1-34.

Pau, L F, 1986. "Survey of expert systems for fault detection, test generation and maintenance" *Expert Systems*, 3 (2) pp 100-111.

Twenty Five offprints of each paper will be provided free of charge. Additional offprints may be purchased according to a set scale of charges if ordered when the proofs are returned.
