Applied artificial intelligence

Vol. 8 No. 1

Special issue: Real world-applications for machine learning, part 1

Can machine learning solve my problem?

Yves Kodratoff, Vassilis Moustakis, and Nicolas Graner

Multistrategy learning for document recognition

Floriana Esposito, Donato Malerba, and Giovanni Semeraro

Left—a system that learns rules about VLSI design from structural descriptions

Jürgen Herrmann and Renate Beckmann

Machine learning in transport engineering: a feasibility study

T. Arciszewski, S. Khasnabis, S. Khurshidul Hoda, and W. Ziarko

Representation design and brute-force induction in a boeing manufacturing domain

Patricia Riddle, Richard Segal, and Oren Etzioni

Face recognition through learned boundary characteristics

L. Spacek, M. Kubat, and D. Flotzinger

Announcement

Artificial intelligence and law

Vol. 2 No. 1

Articles

A computational model of ratio decidendi

Editor's introduction/Special Section: Invited talks at the Fourth International Conference on Artificial Intelligence and Law. Reader Responses Invited

L. Karl Branting

On the artificiality of artificial intelligence

Hans F. M. Crombag

Artificial morality and artificial law

Lothar Philipps

The importance of commercial case studies in artificial intelligence and law

Richard Susskind

Technology report: PHAROS: Business Adviser

Matthew Harbridge and Marc Catchpole

Artificial intelligence in medicine

Vol. 6 No. 1

Articles

A causal and temporal reasoning model and its use in drug therapy applications

P. Barahona

Integrating consultation and semi-automatic knowledge acquisition in a prototype-based architecture:

Experiences with dysmorphic syndromes

L. Gierl and S. Stengel-Rutkowski

Polygenic trait analysis by neural network learning

L. M. Fu

A support for decision-making: Cost-sensitive learning system

Decision support systems

Vol. 11 No. 2

Special issue on logic modeling

Editor's introduction to the special issue on logic modeling

H.K. Bhargava and S.O. Kimbrough

EVID: A system for interactive defeasible reasoning

R.L. Causey

Defeasible reasoning in law

S.K. Dewitz, Y. Ryu and R.M. Lee

Ordered logic: Defeasible reasoning for multiple agents

P. Geerts, D. Vermeir and D. Nute

Bayesian logic

K.A. Andersen and J.N. Hooker

A relational algebra for propositional logic

R.W. Blanning

Text editing and beyond: A study in logic modeling

M. Bieber and T. Isakowitz

On the logic of generalized hypertext

M.P. Bieber and S.O. Kimbrough

Vol. 11 No. 3

Articles

Logic decisions under constraints

A. Monfroglio

Interactive decision support system for organisational analysis

Sushil and B. Raghunathan

Development of the city of quality: A hypertext-based group decision support system for quality function deployment

M. Wolfe

Vol. 11 No. 4

Articles

The meaning of the interface: A functional and holistic evaluation of a meeting software system

G. DeSanctis, J.R. Snyder and M.S. Poole

A decision engine based on rational aggregation of heuristic knowledge

D. Dubois and J.-L. Koning

MCView: An integrated graphical system to support multiattribute decisions.

R. Vetschera

Schedule management: An object oriented approach

G. Wolf

Expert systems with applications

Vol. 6 No. 1

Special issue: case-based reasoning and its applications

Guest Editors' note

Ting-Peng Liang and Efraim Turban

Case-based reasoning: an introduction

Karen Kettler

Episodic cases and real-time performance in a case-based planning system

Robert McCartney

Acquiring implicit knowledge in a complex domain

Alok R. Chaturvedi

MODELER: Incorporating experiences to support model formulation—a case-based planning approach

Ravi C. Vellore, Ajay S. Vinze and Arun Sen

Verification and validation of case-based systems

Daniel E. O'Leary

Generalized case-based reasoning system for portfolio management

Robert T. Chi, Minder Chen and Melody Y. Kiang

Development of a case-based expert system: application to a service coordination problem

Youngohc Yoon, Angela D. Acree and Lynn L.

Peterson

Case-based learning for knowledge-based optimization modeling system: UNIK-CASE

Jae Kyu Lee and Min Yong Kim
