Vol. 9 No. 1

Articles

Carpe ai diem

N. D. Stone

Self correction of simulation-models using genetic algorithms

R. A. Sequeira and R. L. Olson

Integrated wheat crop management based on generic task knowledge-based systems and ceres numerical-simulation

A. Kamel, K. Schroeder, J. Sticklen, A. Rafea, A. Salah, U. Schulthess, R. Ward and J. Ritchie

Incorporating rule-based reasoning in the spatial modeling of succession in a savanna landscape

D. K. Loh and Y. T. C. Hsieh

Nonmetric conceptual clustering in ecology and ecotoxicology

G. Matthews, R. Mathews and W. Landis

NAIA—a decision-support system for predicting ecosystems from existing land resource data

J. A. Mulder and I. G. W. Corns

Object-oriented constraint satisfaction planning for whole-farm management

N. D. Stone

Crop management planning as a fuzzy and uncertain constraint satisfaction problem

R. Martinclouaire and J. P. Rellier

Modeling adaptive fishery activities facing fluctuating environments—an AI approach

J. Lefur

Multiagent problem-solving and object-oriented decision-support systems for natural-resource management

H. Saarenmaa, J. Pertunen, J. Vakeva and J. M. Power

Another look at expert visual assessment—validity and reliability

G. J. Buhyoff, P. A. Miller, R. B. Hull and D. H. Schlagel

AI communications

Vol. 8 No. 1

Articles

Inductive logic programming: a survey of European research

Applied artificial intelligence

Vol. 8 No. 4

Special issue:

Real World Applications of Machine Learning

Part 2

Explanation-based natural language acquisition using universal linguistic principles as innate domain theory

Rey-Long Liu and Von-Wun Soo

Reinforcement learning or tracking of input-output maps

Michael Heiss

Industrial expert system acquired by machine learning

Mouna El Attar and Xavier Hamery

Fielded machine learning system for vocational counselling

Harald Kjellin and Magnus Boman

Analyzing French justice with a genetic-based inductive algorithm

Gilles Venturini

Knowledgeable learning using mobil: a medical case study

K. Morik, G. Potamias, V. S. Moustakis and G. Charissis

Machine learning goes to the bank

Claire Nedellec, Joaquim Correia, José Luis Ferreira and Ernesto Costa

Vol. 9 No. 1

Special issue:

Function-Based Reasoning

Part 2

Future directions in function-based reasoning

Jon Sticklen and James McDowell

Causal functional representation language with behavior-based semantics

Yumi Iwasaki, Markos Vescovi, Richard Fikes and B. Chandrasekaran

Failure mode effects analysis: a practical application of functional modeling

J. E. Hunt, D. R. Pugh and C. J. Price

Function metrics for engineered devices

Srikanth M. Kannapan

Function-based candidate discrimination during model-based diagnosis

Amruth N. Kumar and Shambhu J. Upadhyaya

Repair of communication systems by working around failures

Beat Liver

Functional representation and reasoning for reflective systems

Eleni Stroulia and Ashok K. Goel

Announcements

Applied intelligence

Vol. 5 No. 2

Special issue on connectionist networks for high-level reasoning

Schemas, logics, and neural assemblies

R. Sun

High-level reasoning, computational challenges for connectionism, and the compositional solution

J. A. Barnden

Script-based inference and memory retrieval in subsymbolic story processing

R. Miikkulainen

Goal plan analysis via distributed semantic representations in a connectionist system

M. G. Dyer and G. Lee

Artificial intelligence in engineering

Vol. 9 No. 2

Articles

Training the neocognitron network using design of experiments

M. Y. Teo and S. K. Sim

Generation of operation sequences for accident restoration of primary substations based on a reusable knowledge-base

Q. R. Zhang, Y. Takaoka, M. Sakamoto, K. Kidokoro, K. Hirobe and R. Mizoguchi

Diagnosing continuous systems with qualitative dynamic-models

Q. Shen and R. Leitch

Highway design by constraint specification

J. L. P. Delacruz, R. Conejomunoz and R. Moralesbueno

Artificial intelligence review

Vol. 8 No. 4

Articles

Issues in commonsense set-theory

M. Pakkan and V. Akman

Lexicalization in natural-language generation—a survey

M. Stede

Vol. 8 Nos. 5–6

Articles

Integration of natural-language and vision processing—more computational models and systems

P. McKeivitt

Computational models for integrating linguistic and visual information—a survey

R. K. Srihari

Grounding language in perception

J. M. Siskind

Connectionist visualization of tonal structure

N. Griffith

Use of captions and other collateral text in understanding photographs

R. K. Srihari

The Denk-architecture—a fundamental approach to user-interfaces

R. M. C. Ahn, R. J. Beun, T. Borghuis, H. C. Bunt and C. W. A. M. Vanoverveld

Ai meets authoring—user models for intelligent multimedia

A. Csinger, K. S. Booth and D. Poole

Artificial intelligence

Vol. 72 Nos. 1-2

Articles

- Computational research on interaction and agency
P. E. Agre
- Sensorimotor transformations in the worlds of frogs and robots
M. A. Arbib and J. S. Liaw
- Learning to act using real-time dynamic-programming
A. G. Barto, S. J. Bradtke and S. P. Singh
- Learning dynamics—system-identification for perceptually challenged agents
K. Basye, T. Dean and L. P. Kaelbling
- A dynamical-systems perspective on agent environment interaction
R. D. Beer
- On information invariants in robotics
B. R. Donald
- The stabilization of environments
K. J. Hammond, T. M. Converse and J. W. Grass
- An architecture for adaptive intelligent systems
B. Hayesroth

Vol. 73 Nos. 1-2

Articles

- Analysis of adaption and environment
I. Horswill
- The intelligent use of space
D. Kirsh
- Indexical knowledge and robot action—a logical account
Y. Lesperance and H. J. Levesque
- Exploiting patterns of interaction to achieve reactive behavior
D. M. Lyons and A. J. Hendriks
- A situated view of representation and control
S. J. Rosenschein and L. P. Kaelbling

The use of dynamics in an intelligent controller for a space faring rescue robot

M. Schoppers

On social laws for artificial agent societies—off-line design

Y. Shoham and M. Tennenholtz

Instructions, intentions and expectations

B. Webber, N. Badler, B. Dieugenio, C. Geib, L. Levison and M. Moore

Reinforcement learning of non-Markov decision-processes

S. D. Whitehead and L. J. Lin

Vol. 74 No. 1

Articles

- Automated reasoning about machines
A. Gelsey
- Inductive functional programming using incremental program transformation
R. Olsson
- World modeling for the dynamic construction of real-time control plans
D. J. Musliner, E. H. Durfee and K. G. Shin
- Horn approximations of empirical-data
H. Kautz, M. Kearns and B. Selman
- Default reasoning about spatial occupancy
M. Shanahan
- Quantitatively relating abstractness to the accuracy of admissible heuristics
A. Prieditis and R. Davis
- Computing marginals for arbitrary subsets from marginal representation in Markov trees
H. Xu
- Machine discovery in chemistry—new results
R. E. Valdesperez

Computers and artificial intelligence

Vol 13 No. 4

Articles

- Declarative programming for conventional mimd multiprocessors
L. Bic, J. M. A. Roy and M. Nagel
- Communication and transactions in vienna parallel logic
E. Kuhn, F. Puntigam and H. Pohlai
- The structured data handling in high-performance specialized computer-system
J. Kollar
- The asynchronous zero-searching problem
M. I. Sessa
- The generalized Levinson algorithm for block least-squares methods of linear prediction
G. Oksa
- Incremental knowledge acquisition for nonmonotonic reasoning
F. Sebastiani and U. Straccia
- An efficient strategy for analysis and verification in rule-based expert-system development
N. Schindler

Vol. 13 No. 5

Articles

- Stratified grammar systems
E. Csuhanvarju, J. Dassow, J. Kelemen and G. Paun
- Hybrid systems for expertise modeling—from concepts to a medical application in electromyography
B. Orsier, I. Iordanova, V. Rialle and A. Giacometti

Conditions for convergence of genetic algorithms through Walsh-series

D. Barrios, J. A. P. Ruydiaz, J. Rios and J. Segovia

Genetic algorithms and trees (1) Recognition trees (the fixed-width case)

H. Vanhove and A. Verschoren

PNS—a dynamic mapping strategy for massively-parallel computers

M. Cannataro, G. Spezzano and D. Talia

Formal reasoning on timing at the timing diagram level
V. Cingel and N. Fristacky

Vol. 13 No. 6

Articles

- Sequential and parallel simulations of nondeterministic computations
J. Wiedermann
- Parallel pattern-recognition using dynamic-programming
M. Becka and G. V. Thang
- Candela—a topology description language
H. Kuchen and H. Stoltze
- A framework for network modeling
Z. Markov and L. Sinapova
- Factorizing the complete graph k-12 by computer
E. Urland and L. Stacho
- Modeling of neuronal functions—a neuron-like element with the graded response
J. Janco, I. Stavrovsky and J. Pavlasek

Computational linguistics

Vol 20 No. 4

Articles

A syntactic analysis method of long Japanese sentences based on the detection of conjunctive structures

Sadao Kurohashi and Makoto Nagao

An algorithm for pronominal anaphora resolution

Shalom Lappin and Herbert J. Leass

Word sense disambiguation using a second language monolingual corpus

Ido Dagan and Alon Itai

Machine translation divergences: a formal description and proposed solution

Bonnie J. Dorr

Training and scaling preference functions for disambiguation

Hiyan Alshawi and David Carter

Storing logical form in a shared-packed forest

Mary P. Harper

Author index to volume 14

Subject index to volume 14

Calendar of forthcoming conferences

Vol. 15 No. 1

Articles

Formal deadlock elimination in an object oriented conceptual schema

G. Dedene and M. Snoeck

Implementation of a logic-based support system for concurrent engineering

A. R. Greef, S. M. Fohn, R. E. Young and P. J.

O'Grady

A new method for integrity constraint in deductive databases

R. Seljée

Conference announcement DEON'96

Calendar

Vol. 15 No. 2

Articles

Reusing specifications through refinement levels

V. De Antonellis and B. Pernici

Information disclosure in evolving information systems: taking a shot at a moving target

H. A. Proper and T. P. van der Weide

Selection of object surrogates to support clustering

J. Teuhola

Calendar of forthcoming conferences

Engineering applications of artificial intelligence

Vol. 7 No. 6

Articles

Mipas—a neural-network-based multimedia information-processing and analysis system

Z. J. Miao and B. Z. Yuan

Developing real-time knowledge-based systems with perfect

J. M. A. Sassen and A. Ollongren

Probabilistic reasoning in an augmented fact proposition space and its applications

Q. M. Zhu

A differential-processing extraction approach to text and image segmentation

G. W. Leng, D. P. Mital, T. S. Yong and T. K. Kang

Knowledge engineering for model-based diagnosis—an experience-based development approach

N. F. Doherty and A. K. Kochhar

Rgen—a method for computer-aided-design of rule-based systems for plant process diagnosis

A. Poletykin

A neural-network-based model-reference PID-like controller for process-control

T. H. Lee, P. K. Yue and K. K. Tan

An agent-based framework for cooperating expert-systems in concurrent engineering

G. Q. Huang

Vol. 8 No. 1

Articles

A knowledge-based adviser for the automatic selection and sequencing of orienting devices for vibratory feeding

P. S. Tan, B. K. A. Ngoi, S. S. G. Lee and L. E. N. Lim

Eliciting knowledge for material design in steel making using paper models and codification scheme

X. D. Fang and S. S. Shivathaya

Intelligent diagnosis for turbine blade faults using artificial neural networks and fuzzy-logic

R. J. Kuo

A syntactic pattern-recognition approach for process monitoring and fault-diagnosis

R. Rengaswamy and V. Venkatasubramanian

Episode analysis—a practical approach for temporal reasoning in automated processes

S. Parthasarathy

Topological design of computer-communication networks using simulated annealing

S. Pierre, M. A. Hyppolite, J. M. Bourjolly and O. Dioume

Random activation weight neural-net (RAWN) for fast noniterative training

H. A. B. Tebraake and G. Vanstraten

A bar-code recognition system using backpropagation neural networks

H. Y. Liao, S. J. Liu, L. H. Chen and H. R. Tyan

Real-time navigation and obstacle avoidance based on grids method for fast mobile robots

Z. Q. Ma and Z. R. Yuan

Building temporal constraints into knowledge bases for process-control—an examination

J. X. Ma and B. Knight

Expert systems with applications

Vol. 8 No. 3

Articles

European verification and validation of knowledge-based systems—preface

J. Cardenosa

Valid—an environment for validation of KBS

J. Cardenosa

Validation and verification of KADS data and domain knowledge

A. Rouge, J. Y. Lapicque, F. Brossier and Y. Loziquez

Refinement in response to validation

S. Craw and D. Sleeman

On the verification of modular logical knowledge bases

G. Antoniou and V. Sperschneider

Coupling modeling and validation in commet

D. Canamero, S. Geldof and A. McIntyre

Consistency of structured knowledge—a formal framework based on description logics

P. Hors and M. C. Rousset

Knowledge-based systems verification—a machine learning-based approach

H. Lounis

Knowledge validation in the building of a knowledge-based system

C. Vicat, P. Brezillon and C. Nottola

Human-computer interaction

Vol. 10 No. 1

Articles

Living design memory: framework, implementation, lessons learned

L. G. Terveen, P. G. Selfridge and M. D. Long

Algorithms for automatic dialogue analysis using propositional production systems

D. R. Olsen, Jr., A. F. Monk and M. B. Curry

Beyond object-oriented technology: where current approaches fall short

G. Fischer, D. Redmiles, L. Williams, G. I. Puhr, A. Aoki and K. Nakakoji

IEEE transactions on knowledge and data engineering

Vol. 7 No. 2

Articles

Index organizations for object-oriented database-systems

E. Bertino and P. Foscoli

Query optimization and execution plan generation in object-oriented data management-systems

D. D. Straube and M. T. Ozsu

A theory of translation from relational queries to hierarchical queries

W. Y. Meng, C. Yu and W. Kim

Optimizing sort order query execution in balanced and nested grid files

T. A. Mueck and M. J. Schauer

Chain-split evaluation in deductive databases

J. W. Han

Security constraint processing in a multilevel secure distributed database-management system

B. Thuraisingham and W. Ford

Constructing quantitative models using monotone relationships

J. L. Hellerstein

Allocating data and operations to nodes in distributed database design

S. T. March and S. Rho

The design of efficient algorithms for 2-dimensional pattern-matching

J. J. Fan and K. Y. Su

Evaluation of recursive queries with extended rules in deductive databases

S. H. Lee and L. J. Henschen

Checkpointing for optimistic concurrency-control methods

A. Thomasian

Unified integration of explicit knowledge and learning by example in recurrent networks

P. Frasconi, M. Giro, M. Maggini, G. Soda

Nonredundant 2D strings

G. Costagliola, F. Ferrucci, G. Tortora and M. Tucci

IEEE transactions on neural networks

Vol. 5 No. 4

Articles

Using mutual information for selecting features in supervised neural-net learning

R. Battiti

2nd-order bounds on the domain of attraction and the rate of convergence of nonlinear dynamical-systems and neural networks

N. Peterfreund and Y. Baram

Self-creating and organizing neural networks

D. I. Choi and S. H. Park

Adaptation of the relaxation method for learning in bidirectional associative memory

H. Oh and S. C. Kothari

Learning in linear systolic neural-network engines—analysis and implementation

S. R. Jones, K. M. Sammut and J. Hunter

Radial basis function neural-network for approximation and estimation of nonlinear stochastic dynamic-systems

S. Elanayar and Y. C. Shin

A neural-network model of causality

R. Sun

How delays affect neural dynamics and learning

P. Baldi and A. F. Atiya

Diffusion network architectures for implementation of gibbs samplers with applications to assignment problems

P. Y. Ting and R. A. Iltis

Neural-network control of communications-systems

R. J. T. Morris and B. Samadi

Weight shifting techniques for self-recovery neural networks

C. Khunasaraphan, K. Vanapipat and C. Lursinsap

Acoustic-to-phonetic mapping using recurrent neural networks

M. D. Hanes, S. C. Ahalt and A. K. Krishnamurthy

Novel heterostructure device for electronic pulse-mode neural circuits

C. Song and K. P. Roenker

Vol. 5 No. 5

Articles

Global analysis of OJAS flow for neural networks

W. Y. Yan, U. Helmke and J. B. Moore

Multilayer neural networks for reduced-rank approximation

K. I. Diamantaras and S. Y. Kung

Developing higher-order networks with empirically selected units

A. Kowalczyk and H. L. Ferra

Detection and classification of underwater acoustic transients using neural networks

T. L. Hemminger and Y. H. Pao

Exponential stability and oscillation of hopfield graded response neural-network

H. Yang and T. S. Dillon

Synthesis of brain-state-in-a-box (BSB) based associative memories

W. E. Lillo, D. C. Miller, S. F. Hui and S. H. Tak

On the initialization and optimization of multilayer perceptions

N. Weymaere and J. P. Martens

Weight smoothing to improve network generalization

J. S. N. Jean and J. Wang

Maximum-likelihood training of probabilistic neural networks

R. L. Streit and T. E. Luginbuhl

A neural-network learning algorithm tailored for vlsi implementation

P. W. Hollis and J. J. Paulos

Enhanced MLP performance and fault-tolerance resulting from synaptic weight noise during training

A. F. Murray and P. J. Edwards

Synthetic approach to optimal filtering

J. T. H. Lo

Multilayer associative neural networks (MANNS)—storage capacity versus perfect recall

H. Kang

Hierarchical intelligent control for robotic motion

T. Shibata and T. Fukuda

Neural-network applications for jamming state information generator

H. M. Kwon and L. T. Schaefer

A new winners-take-all architecture in artificial neural networks

J. C. Yen, F. J. Chang and S. Y. Chang

Can backpropagation error surface not have local minima—comment

L. G. C. Hamey

The best approximation to c-2 functions and its error-bounds using regular-center gaussian networks

B. F. Liu and J. Si

Pruning recurrent neural networks for improved generalization performance

C. L. Giles and C. W. Omlin

Vol. 6 No. 1**Articles**

- Existence and uniqueness results for neural-network approximations
R. C. Williamson and U. Helmke
- A general mean-based iterative winner-take-all neural-network
J. F. Yang, C. M. Chen, W. C. Wang and J. Y. Lee
- Approximation capability in $c(\overline{r(n)})$ by multilayer feedforward networks and related problems

R. Anand, K. Mehrotra, C. K. Mohan and S. Ranka
- Improving the performance of Kanervas associate memory
S. W. Ryan and J. H. Andreae
- Robust principal component analysis by self-organizing rules based on statistical physics approach
L. Xu and A. L. Yuille
- Diagonal recurrent neural networks for dynamic-systems control
C. C. Ku and K. Y. Lee
- Optimal adaptive k-means algorithm with dynamic adjustment of learning rate
C. Chinrungrueng and C. H. Sequin
- Decision-based neural networks with signal image classification applications
S. Y. Kung and J. S. Taur
- Gradient descent learning algorithm overview—a general dynamical-systems perspective
P. Baldi
- Neighborhood sequential and random training techniques for CMAC
D. E. Thompson and S. Kwon
- Fast neural-net simulation with a dsp processor array
U. A. Muller, A. Gunzinger and W. Guggenbuhl
- Adaptive-detection of small sinusoidal signals in non-Gaussian noise using an RBF neural-network
D. M. Hummels, W. Ahmed and M. T. Musavi
- Random noise effects in pulse-mode digital multilayer neural networks
Y. C. Kim and M. A. Shanblatt
- Asymptotic level density in topological feature maps
D. R. Dersch and P. Tavan
- The geometrical learning of binary neural networks
J. H. Kim and S. K. Park
- The transversal imager—a photonic neurochip with programmable synaptic weights
J. R. Tower and N. Farhat
- A neural-network filter to detect small targets in high clutter backgrounds
M. V. Shirvaikar and M. M. Trivedi

Analog optimization with Wongs stochastic neural-network
G. Kesidis

- A single-iteration threshold hamming network
I. Meilijson, E. Ruppim and M. Sipper
- Learning capability assessment and feature space optimization for higher-order neural networks
L. Villalobos and F. L. Merat
- Use of a quasi-Newton method in a feedforward neural-network construction algorithm
R. Setiono and L. C. K. Hui
- Adaptive learning-method in self-organizing map for edge-preserving vector quantization
Y. K. Kim and J. B. Ra
- Limitations of neural networks for solving traveling salesman problems
A. H. Gee and R. W. Prager
- Locally excitatory globally inhibitory oscillator networks
D. L. Wang and D. Terman

Vol. 6 No. 2**Articles**

- Combinatorial optimization with use of guided evolutionary simulated annealing
P. P. C. Yip and Y. H. Pao
- Artificial neural networks for feature-extraction and multivariate data projection
J. C. Mao and A. K. Jain
- Classification of linearly nonseparable patterns by linear threshold elements
V. P. Roychowdhury, K. Y. Siu and T. Kailath
- Accuracy analysis for wavelet approximations
B. Delyon, A. Juditsky and A. Benveniste
- High-capacity hebbian storage by sparse sampling
D. Salee and Y. Baram
- Reliability characteristics of quadratic Hebbian-type associative memories in optical and electronic network implementations
P. C. Chung and T. F. Krile
- Generalization and pac learning—some new results for the class of generalized single-layer networks
S. B. Holden and P. J. W. Rayner
- Performance evaluation of multilayer perceptrons in signal-detection and classification
Z. H. Michalopoulou, L. W. Nolte and D. Alexandrou
- A neural computation model with short-term-memory
M. D. Tom and M. F. Tenorio
- Learning the global maximum with parameterized automata
M. A. L. Thathachar and V. V. Phansalkar
- Implementing regularly structured neural networks on the dream machine
S. Shams and J. L. Gaudiot
- High-order neural-network structures for identification of dynamical-systems
E. B. Kosmatopoulos, M. M. Polycarpou, M. A. Christodoulou and P. A. Ioannou
- The selection of weight accuracies for Madalines
S. W. Piche
- Complete and partial fault-tolerance of feedforward neural nets
D. S. Phatak and I. Koren
- Principal component extraction using recursive least-squares learning
S. Bannour and M. R. Azimisadjadi
- A new method to optimize the satellite broadcasting schedules using the mean-field
N. Ansari, E. S. H. Hou and Y. Y. Yu
- Object recognition of one-DOF tools by a backpropagation neural-net
H. B. Kim and K. H. Nam
- Binary classification by stochastic neural nets
A. Nadas

An analysis of high-capacity discrete exponential BAM
C. C. Wang and H. S. Don
 Multiple network fusion using fuzzy-logic
S. B. Cho and J. H. Kim
 Sensitivity of equilibrium points in continuous-time
 Hopfields network
R. Perfetti
 Design of a perceptron-like algorithm-based on system-
 identification techniques
M. Saerens
 Generalization in multilayer networks of sigma-pi units
W. D. Penny and T. J. Stonham
 Recursive single-layer nets for output error dynamic-
 models
C. S. Berger

Learning in multilayered networks used as
 autoassociators

Introduction to the special section on knowledge-based
 construction of probabilistic and decision-models

J. S. Breese, R. P. Goldman and M. P. Wellman

Tradeoffs in knowledge-based construction of
 probabilistic models

G. M. Provan

Dynamic belief networks for discrete monitoring

A. E. Nicholson and J. M. Brady

Inference-driven construction of valuation system from
 1st-order clauses

A. Saffiotti and E. Umkehrer

Graph-grammar assistance for automated generation of
 influence diagrams

J. W. Egar and M. A. Musen

Metareasoning and the problem of small worlds

K. B. Laskey and P. E. Lehner

Dynamic construction and refinement of utility-based
 categorization models

K. L. Poh, M. R. Fehling and E. J. Horvitz

Vol. 25 No. 1**Articles**

Linear classifiers by window training

L. Bobrowski and J. Sklansky

Evidential reasoning for building environment maps

A. P. Tirumalai, B. G. Schunck and R. C. Jain

Distributed binary hypothesis-testing with feedback

*D. A. Pados, K. W. Halford, D. Kazakos and
 P. Papantonikazakos*

A general-model for task distribution on an open
 heterogenous processor system

S. Olafsson

Bayesian alternatives to neural computing

J. C. Westland

The m-asterisk-object methodology for information-
 system design in CIM environments

G. Berio, A. Dileva, P. Giolito and F. Vernadat

Constraints on belief functions imposed by fuzzy random-variables

C. Romer and A. Kandel

An integrated architecture for robot motion planning and control in the presence of obstacles with unknown trajectories

R. Spence and S. Hutchinson

Dominant incentive strategies for hierarchical systems with incomplete information-structure

C. H. Xu and K. Kijima

Fuzzy rules extraction directly from numerical data for function approximation

S. Abe and M. S. Lan

Structured representation of rule-based specifications in CIM using updated Petri nets

G. Harhalakis, C. P. Lin, L. Mark and P. R. Muromedrano

Highly-efficient robot dynamics learning by decomposed connectionist feedforward control-structure

D. M. Katic and M. K. Vukobratovic

On the architecture and implementation of parallel ordinal machines

A. Bendavid and G. Bendavid

Design of fuzzy-systems with fuzzy flip-flops

K. Hirota and W. Pedrycz

Border detection of the object segmented by the pyramid linking method

Z. Tomori

Dynamic process monitoring and fault-diagnosis with qualitative models

J. M. Vinson and L. H. Ungar

Epistemic utility estimation with valuational convexity

V. Kafedziski and D. Morrell

Reflections on information and information value

T. B. Sheridan

Fuzzy hypergraph and fuzzy partition

H. Leekwang and K. M. Lee

Parametric string edit distance and its application to pattern-recognition

H. Bunke and J. Csirik

A systematic-approach to obtaining fuzzy-sets for control-systems

V. S. Manoranjan, A. D. Lazaro, D. Edwards and A. Athalye

FPGA for fuzzy controllers

M. A. Manzoul and D. Jayabharathi

International journal of computer vision

Vol. 13 No. 1

Articles

A study of affine matching with bounded sensor error

W. E. L. Grimson, D. P. Huttenlocher and D. W. Jacobs

Estimating the heading direction using normal flow

Y. Aloimonos and Z. Duric

Robust estimation of egomotion from normal flow

D. Sinclair, A. Blake and D. Murray

Space-variant image-processing

R. S. Wallace, P. W. Ong, B. B. Bederson and E. L. Schwartz

Analyzing skewed symmetries

A. D. Gross and T. E. Boulton

Vol. 13 No. 2

Articles

Iterative point matching for registration of free-form curves and surfaces

Z. Y. Zhang

Robust and fast computation of edge characteristics in image sequences

T. Vieville and O. Faugeras

Constrained pose refinement of parametric objects

R. R. Goldberg

3-dimensional shape from color photometric stereo

P. H. Christensen and L. G. Shapiro

Region-based strategies for active contour models

R. Ronfard

Vol. 13 No. 3

Articles

Fast computation of unbiased intensity derivatives in images using separable filters

J. Devriendt

Depth from defocus—a spatial domain approach

M. Subbarao and G. Surya

Mirror uncertainty and uniqueness conditions for determining shape and motion from orthographic projection

X. Hu and N. Ahuja

Integrating qualitative and quantitative shape recovery

S. J. Dickinson and D. Metaxas

Review and analysis of solutions of the 3-point perspective pose estimation problem

R. M. Haralick, C. N. Lee, K. Ottenberg and M. Nölle

Vol. 14 No. 1

Articles

Foundations of semi-differential invariants

T. Moons, E. J. Pauwels, L. J. Van Gool and A. Oosterlinck

Recognition of planar shapes under affine distortion

E. J. Pauwels, T. Moons, L. J. Van Gool, P. Kempenaers and A. Oosterlinck

Robust computation of optical flow in a multi-scale differential framework

J. Weber and J. Malik

Contour extraction of moving objects in complex outdoor scenes

M. P. Dubuisson and A. K. Jain

Vol. 14 No. 2

Articles

Qualitative vision

Y. Aloimonos

Context-free attentional operators—the generalized symmetry transform

D. Reifeld, H. Wolfson and Y. Yeshurun

Optical-flow from 1-d correlation—application to a simple time-to-crash detector

N. Ancona and T. Poggio

Passive navigation as a pattern-recognition problem

C. Fermuller

Divergent stereo in autonomous navigation—from bees to robots

J. Santosvictor, G. Sandini, F. Curotto and S. Garibaldi

Discrete-event modeling of visually guided behaviors

J. Kosecka, H. I. Christensen and R. Bajcsy

Vol. 14 No. 3

Articles

Probabilistic analysis of the application of the cross ratio to model-based vision—misclassification

S. J. Maybank

Occlusions and binocular stereo

D. Geiger, B. Ladendorf and A. Yuille

Generalization of the Lambertian model and implications for machine vision

M. Oren and S. K. Nayar

Segmentation of range images as the search for geometric parametric models

A. Leonardis, A. Gupta and R. Bajcsy

Vol. 13 Nos. 1–2

Special Issue: Image Understanding Research at the University of Maryland

Qualitative egomotion

C. Fermüller and Y. Aloimonos

Automatic feature point extraction and tracking in image sequences for arbitrary camera motion

Q. Zheng and R. Chellappa

Experiments on estimating egomotion and structure parameters using long monocular image sequences

T. H. Wu, R. Chellappa and Q. Zheng

Egomotion analysis based on the Frenet-Serret motion model

Z. Duric, A. Rosenfeld and L. S. Davis

Model-based object pose in 25 lines of code

D. F. DeMenthon and L. S. Davis

Recovery of temporal information from static images of handwriting

D. S. Doermann and A. Rosenfeld

International journal of human–computer studies

Vol. 40 No. 6

Articles

A probabilistic theory of model-based diagnosis

J.-S. Chen and S. N. Srihari

Menus and memory load: navigation strategies in interactive search tasks

P. Wright and A. Lickorish

A comprehensive comparison between generalized incidence calculus theory and the Dempster–Shafer theory of evidence

W. Liu and A. Bundy

Creating, comprehending and explaining spreadsheets: a cognitive interpretation of what discretionary users think of the spreadsheet model

D. G. Hendry and T. R. G. Green

Vol. 41 Nos. 1–2

Special issue on object-oriented approaches in artificial intelligence and human–computer interaction

Editorial

Articles

An object-based representation system for organic synthesis planning

A. Napoli, C. Laureço and R. Ducournau

Developing integrated object environments for building large knowledge-based systems

J.-P. A. Barthès

Class library implementation of an open architecture knowledge support system

B. R. Gaines

Managing complex objects in Peirce

G. Ellis, R. A. Levinson and P. J. Robinson

Default inheritance in an object-oriented representation of linguistic categories

W. Daelmans and K. De Smedt

Concurrent, object-oriented natural language parsing: the *Parse Talk* model

U. Hahn, S. Schacht and N. Bröker

Types and inheritance in hypertext

Articles

Isomorphism testing for p-groups

E. A. Obrien

Hilbert series for ideals generated by generic forms

R. Froberg and J. Hollman

Calculations with simplicial and cubical groups in axiom

R. Brown and A. Tonks

A corrigendum for the optimized-ipia

A. Kean and G. Tsiknis

A new method for the boolean ring based theorem-proving

H. T. Zhang

Experimenting with the identity $(xy)z = y(zx)$

I. R. Hentzel, D. P. Jacobs and S. V. Muddana

Vol. 17 No. 3

Articles

Exact transversal hypergraphs and application to boolean mu-functions

T. Eiter

Fast computation of some asymptotic functional inverses

B. Salvy

Idempotent computation over finite-fields

R. A. Davis

Classifying geometries with cayley

M. Dehon

On the smallest divisor of a polynomial

M. Mignotte and P. Glesser

Symbolic computation of Dewitt–Secley–Gilkey coefficients on curved manifolds

V. P. Gusynin and V. V. Kornyak

Vol. 17 No. 4

Articles

Algorithms—implementation, libraries and use—introduction

K. Mehlhorn, S. Naher and J. Nievergelt

Complexity, algorithms, programs, systems—the shifting focus

J. Nievergelt

Evolution of a software system—interaction, interfaces and applications in the xyz geobench

P. Schorn

An application of point pattern-matching in astronautics

G. Weber, L. Knipping and H. Alt

Grail—a C++ library for automata and expressions

D. Raymond and D. Wood

Surface reconstruction between simple polygons via angle criteria

E. Welzl and B. Wolfers

Vol. 17 No. 5

Articles

Fast construction of irreducible polynomials over finite-fields

V. Shoup

Injectivity of composite functions

K. S. Larsen and M. I. Schwartzbach

Computing a set of generators of minimal cardinality in a solvable group

A. Lucchini and F. Menegazzo

Regular path expressions in feature logic

R. Backofen

Symbolic local refinement of tetrahedral grids

D. J. Hebert

Vol. 17 No. 6

Articles

Analysis of a left-shift binary gcd algorithm

J. Shallit and J. Sorenson

Zeros of equivariant vector-fields—algorithms for an invariant approach

P. A. Worfolk

A random base change algorithm for permutation-groups

G. Cooperman and L. Finkelstein

Peakword condensation and submodule lattices—an application of the meat-axe

K. Lux, J. Muller and M. Ringe

Multi-modular approach to polynomial-time factorization of bivariate integral polynomials

K. Yokoyama, M. Noro and T. Takeshima

Knowledge acquisition

Vol. 6 No. 2

Articles

Linked-learning for knowledge acquisition—a pilot associate case-study

C. A. Miller and K. R. Levi

An integration of knowledge acquisition techniques and EBL for real-world production planning

T. Reinhartz and F. Schmalhofer

A framework for knowledge-base refinement through multistrategy learning and knowledge acquisition

G. Tecuci and D. Duff

Towards method-independent knowledge acquisition

Y. Gil and C. Paris

Increasing levels of assistance in refinement of knowledge-based retrieval-systems

C. Baudin, B. Bell and S. Kedar

Extending the role of bias in probabilistic theory revision

R. Feldman, M. Koppel and A. Segre

Vol. 6 No. 3

Articles

A primitives-based generic approach to knowledge acquisition

C. C. Chien and C. S. Ho

Domain-driven knowledge modelling for knowledge acquisition

H. S. Nwana, T. J. M. Benchcapon, R. C. Paton and M. J. R. Shave

Attribute focusing—machine-assisted knowledge discovery applied to software production process-control

I. Bhandari

Using apprenticeship techniques to guide constructive induction

S. K. Donoho and D. C. Wilkins

Laddering—technique and tool use in knowledge acquisition

C. Corbridge, G. Rugg, N. P. Major, N. R. Shadbolt and A. M. Burton

Vol. 6 No. 4

Articles

Acquisition and validation of software requirements

B. Biebow and S. Szulman

The semantics of KBSSF, a language for KBS design

J. W. Spee and L. I. Weld

Foundations for a methodology for medical KBS development

G. Vanheijst, G. Schreiber, G. Lanzola and M. Stefanelli

What online machine learning can do for knowledge acquisition—a case-study

E. Sommer, K. Morik, J. M. Andre and M. Uszynski

Configuring problem-solving methods—a cake perspective

M. Hori, Y. Nakamura and T. Hama

Knowledge based systems

Vol. 7 No. 3

Articles

Knowledge representation form in mechanical-engineering

R. Bello, D. Galvez, G. Sanchez, M. M. Garcia and G. Benavides

Knowledge representation for preliminary stages of engineering tasks

I. F. C. Smith and S. Boulanger

Parallel search-and-learn technique for solving large-scale traveling-salesperson problems

C. P. Ravikumar

Dykor—a method for generating the content of explanations in knowledge systems

A. Lopezsuarez and M. Kamel

Speedup of hypothetical reasoning by experience-based learning mechanism

T. Makino and M. Ishizuka

Building an interactive blackboard framework

M. Sunners, D. Dawson and P. Sydenham

Interpretation of neural networks as Boolean transfer-functions

G. P. Fletcher and C. J. Hinde

Vol. 7 No. 4

Articles

Special section—creativity and cognition

E. Edmonds

Turning breakdowns into opportunities for creativity

G. Fischer

Method to assist the building and expression of subjective concepts and its application to design-problems

M. Sugimoto, K. Hori and S. Ohsuga

Programmable applications for the arts—computational tools for hand, eye and mind

M. Eisenberg

Interactive multimedia—creative catalyst or constraint

N. Flint and J. Sparrow

Designing for radical tailorability—coupling artifact and rationale

A. I. Morch

Negotiation in collaborative activity—a discourse analysis

C. L. Sidner

Representing discourse for collaborative interactive generation

S. M. Haller

Maximally efficient dialog mode algorithm

C. I. Guinn

Impact of variable initiative on a natural-language dialog system

R. W. Smith

Vol. 8 No. 1

Articles

Context interchange—a lattice based approach

M. P. Reddy and A. Gupta

Model for exploiting associative matching in AI production systems

N. K. Kasabov, S. H. Lavington, S. Lin and C. Wang

Hybrid knowledge-based architecture for building an intelligent nondestructive signal inspection system

S. J. Kang and Y. R. Kwon

Case-based reasoning for aids initial assessment

L. D. Xu

Cooperating knowledge-based systems for environmental decision-support

N. M. Avouris

Knowledge-based cabin crew pattern generator

L. F. Kwok, S. L. Hung and C. C. J. Pun

Vol. 8 Nos. 2–3

Articles

Overview of human-computer collaboration

L. G. Terveen

Structuring collaborative information-seeking dialogs

A. Stein and E. Maier

Intertwining knowledge delivery and elicitation—a process model for human-computer collaboration in design

K. Nakakoji and G. Fischer

Testing collaborative strategies by computational simulation—cognitive and task effects

M. A. Walker

Cognitive cooperation through visual interaction

E. Rogers

Misunderstanding and the negotiation of meaning using abduction

S. W. McRoy

Negotiation in collaborative activity—an implementation experiment

C. Rich

Work-oriented development of knowledge-based systems—a case for multiple perspectives

M. Stolze

Embedding languages within design environments

M. Eisenberg

Interaction and feedback in a spoken language system—a theoretical framework

S. E. Brennan and E. A. Hulteen

Kybernetes

Vol. 23 No. 1

Articles

Contemporary systems and cybernetics

B. H. Rudall

Formalism, language and information-science

F. H. George

Systolic array design for low-level image-processing

S. A. Amin and D. J. Evans

Human emotion estimation through facial expressions

E. T. Lee

The system analyst and designers vade-mecum, or applicable systematics in a nutshell

C. Muses

Maximum-entropy modeling of mixture distributions

D. N. Politis

On a functional-model of the human system

H. H. Owaled

Is development digital?

B. James

Vol. 23 No. 3

Articles

Contemporary systems and cybernetics

B. H. Rudall

Neural networks as fuzzy-systems

C. V. Negoita

General structure functions

J. Montero, J. Tejada and J. Yanez

A reflective production system

I. D. Craig

Experimental studies of heuristic algorithms for 2-level object clustering

D. Bell and F. McErlean

Theseus—a way of doing

R. Harnden

Boolean-algebra from the lattice point-of-view

E. T. Lee

The principles of self-assembly

B. James

Vol. 23 No. 4

Articles

The scientific methodology in the light of cybernetics

P. R. Masani

Vol. 23 No. 5

Articles

Exploring dynamic group processes with GAIA—groups of adaptive inferencing agents

T. Sedbrook

The phi-entropy in the selection of a fixed number of experiments

J. A. Pardo and M. L. Vicente

International migration as a dynamic process

N. D. Diamantides

Possibility-probability transformation—a new result via information-theory of deterministic functions

G. Jumarie

The optimization of memory in digital-computers

D. B. James

Transcultural communication, relativity and god

P. Okera

2nd European Congress on Systems Science of the UES

R. Vallee

Vol. 23 Nos. 6–7

Articles

A tribute to Wiener, Norbert

B. H. Rudall

Wiener, Norbert 1894–1964 academic vita and bibliography

Knowing Norbert

S. Beer

Wiener insight into communication

E. Vonglasersfeld

The early years—some comments on the origins and concepts of cybernetics

J. Rose

Wiener, Norbert in the early 1950s

R. Vallee

For Wiener, Norbert

F. George

Wiener–Hopf equation revisited

A. Ghosal

The presence of Wiener, Norbert in both order cybernetics

E. Bernardweil

Report of the pre-centenary celebration at the 9th congress, India, 1993

World Organization of Systems and Cybernetics

(WOSC) Institute of Systems and Cybernetics—proposals

B. H. Rudall

Vol. 23 No. 8

Articles

Contemporary systems and cybernetics

B. H. Rudall

Organizational cybernetics—the ecology of change in a Norwegian shipyard

J. A. Johannessen and A. Hauan

An investigation of the ethical standards of information-systems academicians

D. G. Shenias

Entropy, quality and wastivity—a unified view of system performance

H. D. Sharma and Gupta A. D. Sushil

The evolution of vision and its relation to language

B. James

Cyberphilosophy

L. Morley

The new cybernetics

M. B. S. Char

World Organization of Systems and Cybernetics

(WOSC) Norbert Wiener Centenary Celebrations—

WOSC president in-memoriam

12th European meeting on cybernetics and systems research

R. Vallee
