The Knowledge Engineering Review, Vol. 11:3, 1996, 297–300

From the journals. . . .

Applied artificial intelligence

Vol. 10 No. 1
Articles
Cooperative transportation scheduling – an application domain for DAI
K. Fischer, J.-P. Muller and M. Pischel
Reactive motion planning – a multiagent approach
L. Overgaard, H. G. Petersen and J. W. Perram
Situated action approach to implementing characters in computer games
P. Wavish and M. Graham
Vol. 10 No. 2
Articles
Id + – enhancing medical knowledge acquisition with machine learning
L. Gaga, V. Moustakis, Y. Vlachakis and G. Charissis
Route guidance as a just-in-time multiagent task
G. Adorni and A. Poggi
Realistic model for temporal reasoning in real-time patient monitoring
M. Dojat and C. Sayettat
Concurrent, asynchronous search for the availability of knowledge
A. S. Fabiano and S. A. Cerri
Representation of human-computer interaction by means of behavior rules
M. Taboada, R. Marin, J. Mira and M. Macias

Applied Intelligence

Vol. 6 No. 1
Articles
Spatial persistence
H. W. Guesgen and J. Hertzberg
Lattice structure of temporal interval relations
F. D. Anger and R. V. Rodriguez
Experimenting with a temporal constraint propagation algorithm
D. Mitra and R. Loganantharaj
Qualitative spatial reasoning using orientation, distance,and path knowledge
K. Zimmermann and C. Freksa
Representing Allen properties, events, and processes
A. Trudel

Artificial intelligence

Vol. 80 No. 1
Articles
The topology of boundaries
M. M. Fleck
Diagnosis based on explicit means-end models
J. E. Larsson
What-computers-still-can't-do – 5 reviews and a response
M. Stefik and S. Smoliar
Embedded or embodied? – a review of Dreyfus, Hubert What-computers-still-can't-do
H. M. Collins
Body and world – a review of What-computers-still-can't-do – a critique of *artificial reason* (Dreyfus, Hubert.)
J. Haugeland
Of Dreyfus, Hubert and dead horses – some thoughts on Dreyfus' What-computers-still-can't-do
T. Koschmann
Dreyfus, Hubert, What-computers-still-can't-do
J McCarthy
Is artificial intelligence a degenerating program? – a review of Dreyfus, Huberts' What-computers-still-can't-do
J. D. Strom and L. Darden
Response to my critics
H. L. Dreyfus
Vol. 81 Nos. 1, 2
Articles
Phase-transitions and the search problem
T. Hogg, B. A. Huberman and C. P. Williams
Generating hard satisfiability problems
B. Selman, D. G. Mitchell and H. J. Levesque
Experimental results in the crossover point in random 3-SAT
J. M. Crawford and L. D. Auton
The satisfactory constraint gap
I. P. Gent and T. Walsh
Empirical-study of phase-transitions in binary constraint satisfaction problems
P. Prosser
Some pitfalls for experimenters with random SAT
D. G. Mitchell and H. J. Levesque
Refining the phase-transition in combinatorial search
T. Hogg
Locating the phase-transition in binary constraint satisfaction problems
B. M. Smith and M. E. Dyer
Hard random 3-sat problems and the Davis-Putnam procedure
J. W. Freeman
Implicates and prime implicates in random 3-SAT
R. Schrag and J. M. Crawford
A study of complexity transition on the asymmetric traveling salesman problem
W. X. Zhang and R. E. Korf
A probabilistic analysis of propositional strips planning
T. Bylander
Critical-behavior in the computational cost of satisfiability testing
B. Selman and S. Kirkpatrick
Epsilon-transformation – exploiting phase-transitions to solve combinatorial optimization problems
J. C. Pemberton and W. X. Zhang
Problem structure heuristics and scaling behavior for genetic algorithms
S. H. Clearwater and T. Hogg

Engineering applications of artificial intelligence

Vol. 8 No. 6
Articles
Safety, reliability and applications of emerging intelligent control technologies
T. S. Ng and Y. S. Hung
The safety implications of emerging software paradigms
W. L. Persons, G. J. Suski and G. L. Johnson
Dependable, intelligent voting for real-time control software
P. R. Croll, A. J. C. Sharkey, J. M. Bass, N. E. Sharkey and P. J. Fleming
Fail-safe stability for dynamic-systems using natural-network controllers
Y. S. Hung and S. Lam
Static and dynamic preprocessing methods in neural networks
A. C. Tsoi and A. Back
A process-control and diagnostic-tool based on continuous fuzzy Petri nets
G. K. H. Pang, R. Tang and S. S. Woo
Stochastic tuning of a spacecraft controller using neural networks
W. A. Wright
Dynamic voltage security assessment using a fuzzy severity index
S. K. Tso, T. X. Zhu, Q. Y Zeng and K. L. Lo
Solving power-system optimization problems using simulated annealing
K. P. Wong
Testing control software using a genetic algorithm
J. Hunt
Using scheduling in flexible manufacturing systems
E. L. McDuffie, M. Schneider, F. B. Buoni, E. Shnaider, M. Schneider and L. A. Martinvega
Internal model control framework using neural networks for the modeling and control of a bioreactor
A. Aoyama and V. Venkatasubramanian
Network fault-diagnosis using a realistic abductive reasoning model
G. P. Kumar and P. Venkataram
Exshof-II – active-filter design, from approximation function to graphic display of the circuit
A. Barua and N. Patel
Vol. 9 No. 1
Articles
Advances in neurofuzzy algorithms for real-time modeling and control
J. C. Harris, M. Brown, K. M. Bossley, D. J. Mills and F. Ming
A qualitative and heuristic approach to the conceptual design of mechanisms
C. L. Li, S. T. Tan and K. W. Chan
An expert-system study for evaluating technical papers – decision-making for an IPC
B. Tamm
Kydon – an autonomous, multilayer image-understanding system – lower layers
N. G. Bourbakis and J. S. Mertoguno
A scheme for 3D object reconstruction from dimensioned orthographic views
D. Dori and M. Weiss
Modified tuning of a fuzzy-logic controller
J. X. Xu, C. Liu and C. C. Hang
A neural-network approach to the detection of texture boundaries
M. F. Augusteijn and L. E. Clemens
Inverse robot calibration using artificial neural networks
X. L. Zhong, J. Lewis and F. L. Nnagy
Building temporal constraints into knowledge bases for process-control – an examination – reply to authors reply
J. X. Ma and B. Knight

Expert systems with applications

Vol. 10 No. 1
Articles
Acuxpert – an intelligent computer-aided-learning and diagnosing system for acupuncture
K. S. Wang and J. X. Liu
Mobedic – a decison modeling tool for emergency situations
J. G. Doheny and J. L. Fraser
Integration of knowledge sources for flexible pipe evaluation and design
J. A. G. Bogarin and N. F. F. Ebecken
A methodology for simplification and interpretation of backpropagation-based neural-network models
L. W. Glorfeld
A knowledge-based support system for psychological analysis
G. D. Nord and J. H. Nord
A knowledge-based system for scheduling setup changes – an implementation and validation
R. De
Exsgacm – an expert-system for gas crisis management
E. F. Tsang and E. W. T. Ngai
Compilers and knowledge dictionaries for expert-systems – inference engines of the future
W. T. Harding and R. T. Redmond
Imprecise knowledge in expert-systems – a simple shell
B. Grabot and E. Caillaud
A framework for developing expert loading systems for product carriers
G. A. Vouros, T. Panayiotopoulos and C. D. Spyropoulos
Enhancing knowledge elicitation using the cognitive interview
J. W. Moody, R. P. Will and J. E. Blanton
An object knowledge canonical form for knowledge reuse
K. H. Huarng and D. B. Simmons
A hess for resource planning in-service and manufacturing-industries
H. F. Lee, H. J. Cho and R. W. Klepper
A hybrid knowledge-based system for urban-development
F. Shan and L. D. Xu
Vol. 10 No. 2
Articles
Development of a real-time extravehicular mobility unit telemetry monitoring expert-system
D. J. Schuck and J. J. G. Chen
Using domain knowledge to guide database knowledge discovery
M. M. Owrang and F. H. Grupe
Using an expert-system to teach accounting for business combinations
L. M. Smith and R. S. McDuffie
Analysis, design, implementation, and deployment of a prototype maintenance adviser expert-system for the mk92 fire-control system
M. N. Kamel, M. J. McCaffrey and P. G. Metzler
The impact of measurement scale and correlation structure on classification performance of inductive learning and statistical-methods
I. Han, J. S. Chandler and T. P. Liang
Object-oriented approach to a knowledge-based structural design system

K. H. Lee, D. Lee and S. H. Han
Aggregating and updating experts knowledge – an experimental evaluation of 5 classification techniques
B. Mak, T. Bui and R. Blanning
Automated timetabling using an object-oriented scheduler
H. Gunadhi, V. J. Anand and Y. W. Yong
Development, implementation and evaluation of an expert-system for advising naval midshipmen
W. P. McCullough and R. T. Sumichrast
Forecasting short-term regional gas demand using an expert-system
P. Smith, S. Husein and D. T. Leonard
Efficient rule induction from noisy data
H. Liu
An expert-system for evaluation and selection of floor finishing materials
M. A. A. Mahmoud, M. Aref and A. Alhammad
Measurement by an expert-system of the critical parameters of a pure fluid
J. B. Cortes and J. P. Astruc

International journal of computer vision

Vol. 17 No. 1
Articles
Motion of points and lines in the uncalibrated case
T. Vieville, O. Faugeras and Q. T. Luong
The fundamental matrix – theory, algorithms, and stability analysis
Q. T. Luong and O. D. Faugeras
3D free-form surface registration and object recognition
C. S. Chua and R. Jarvis
Vol. 17 No. 2
Articles
Machine vision research at CVAP – an introduction
J. O. Eklundh
Dynamic fixation and active perception
K. Pahlavan, T. Uhlin and J. O. Eklundh
Active fixation for scene exploration
K. Brunnstrom, J. O. Eklundh and T. Uhlin
Direct computation of shape cues using scale-adapted spatial derivative operators
J. Garding and T. Lindeberg
Projectively invariant decomposition and recognition of planar shapes
S. Carlsson

Kybernetes

Vol. 24 No. 3
Articles
Contemporary systems and cybernetics
B. H. Rudall
Fast learning artificial neural networks for continuous input applications
D. J. Evans and L. P. Tay
An algorithm which learns multiple covers via integer linear-programming Part II experimental results and conclusions
K. J. Cios and N. Liu
Rule interpreters in ELEKTRA
I. D. Craig
Representations of logic functions
E. T. Lee
Cybernetic theory of the stochastic-process
S. Madan
Communications and forum – cascading the universal algorithm
B. James
Vol. 24 No. 4
Articles
Current topics in systems and cybernetics
B. H. Rudall
The challenge of sociocybernetics
F. Geyer
Exorcist boolean-algebra and interaction between binary strings
C. Muses
The computer subconscious
H. J. Caulfield
Perturbed living organisms – a cybernetic approach to oscillatory luminescence
B. Kochel
Irrelevance and relevance of godels theorems to artificial-intelligence
S. M. Kim
Principal peculiarities of cybernetic systems – a negentropic and evolutionary approach
A. V. Jdanko
The cartesian composition of fuzzy finite-state machines
D. S. Malik, J. N. Mordeson and M. K. Sen
On the continuity of fuzzy entropies
R. C. Bassanezi and H. E. Romanflores
Vol. 24 No. 5
Articles
Contemporary systems and cybernetics
B. H. Rudall
A mathematical formalization of the principle of ethical endogeneity
M. A. Choudhury
Implementation of the alienor technique in the multidimensional bissection method and application to global optimization – a new accelerated algorithm
H. Ammar and Y. Cherruault
Developing a theoretical foundation for the laws of conservation
Y. Lin
Equation solving with PCs
G. Zielinski
Communications and forum metalogue – why ask questions
J. Kielema
Towards a general-theory of disease
B. James
Vol. 25 No. 1
Articles
Contemporary systems and cybernetics
B. H. Rudall
The invariance of optimum solution in a multiobjective fuzzy environment
B. X. Zhang, B. T. F. Chung and E. T. Lee
Systemics applied to the study of organizational fields – developing a systemic research strategy
J. A. Johannessen
Biocybernetics – fitting the oxyhemoglobin dissociation curve
A. B. Engel, E. Massad and P. Pulino
On applying information principles to fuzzy control
C. Padet
Future medical expert-systems
Y. J. Lee and E. T. Lee
Mapping the universe on to the cerebral-cortex
B. James

IEEE transactions on knowledge and data engineering

Vol. 8 No. 1
Articles

Guest editors introduction to the special issue on secure database-systems technology
B. Thuraisingham and T. C. Ting

A mac policy framework for multilevel relational database
X. L. Qian and T. F. Lunt

A trusted subject architecture for multilevel secure object-oriented databases
R. K. Thomas and R. S. Sandhu

Correctness criteria for multilevel secure transactions
K. P. Smith, B. T. Blaustein, S. Jajodia and L. A. Notargiacomo

Inference in MLS database-systems
D. G. Marks

Wizard – a database inference analysis and detection system
H. S. Delugach and T. H. Hinke

A temporal access-control mechanism for database-systems
E. Bertino, C. Bettini, E. Ferrari and P. Smarati

An access-control model and its use in representing mental-health application access policy
V. Varadharajan and C. Calvelli

Uncertainty management in expert-systems using fuzzy Petri nets
A. Konar and A. K. Mandal

Knowledge processing in control-systems
R. R. Gudwin, F. A. C. Gomide, M. L. A. Netto and M. F. Magalhaes

Genetic search – analysis using fitness moments
M. Srinivas and L. M. Patnaik

Constructing efficient belief network structures with expert provided information
S. Sarkar and I. Murthy

A multi-granularity locking model for concurrency-control in object-oriented database-systems
S. Y. Lee and R. L. Liou

The design and implementation of the ariel active database rule system
E. N. Hanson

The effect of knowledge representation schemes on maintainability of knowledge-based systems
S. R. Lee and R. M. O'Keefe

A knowledge-based control architecture with interactive reasoning functions
G. A. Sullivan

Rule revision with recurrent neural networks
C. W. Omlin and C. L. Giles

A note on incomplete relational database models based on intervals
J. S. Chiu and A. L. P. Chen

Pattern analysis and machine intelligence

Vol. 18 No. 2
Articles

State of PAMI
R. Kasturi

Validation of image defect models for optical character-recognition
Y. H. Li, D. Lopresti, G. Nagy and A. Tomkins

A unified approach for modeling longitudinal and failure time data, with application in medical monitoring
C. Berzuini and C. Larizza

The multiscale classifier
B. C. Lovell and A. P. Bradley

An efficient implementation of Reid's multiple hypothesis tracking algorithm and its evaluation for the purpose of visual tracking
I. J. Cox and S. L. Hingorani

Conic reconstruction and correspondence from 2 views
L. Quan

Recovery of SHGCS from a single intensity view
A. D. Gross and T. E. Boult

A fast scalable algorithm for discontinuous optical-flow estimation
S. Ghosal and P. Vanek

Learning texture-discrimination masks
A. K. Jain and K. Karu

The illumination-invariant recognition of 3D objects using local color invariants
D. Slater and G. Healey

3D shape reconstruction by using vanishing points
P. Parodi and G. Piccioli

Divergence based feature-selection for multimodal class densities
J. Novovicova, P. Pudil and J. Kittler

Vol 18 No. 3
Articles

Graphical templates for model registration
Y. Amit and A. Kong

3-dimensional descriptions based on the analysis of the invariant and quasi-invariant properties of some curved-axis generalized cylinders
M. Zerroug and R. Nevatia

On image-analysis by moments
S. X. Liao and M. Pawlak

Object matching using deformable templates
A. K. Jain, Y. Zhong and S. Lakshmanan

Computing occlusion-free viewpoints
K. Tarabanis, R. Y. Tsai and A. Kaul

Vehicle segmentation and classification using deformable templates
M. P. D. Jolly, S. Lakshmanan and A. K. Jain

Scaling theorems for zero crossings of band-limited signals
V. Anh, J. Y. Shi and H. T. Tsui

Implicit simplicial models for adaptive curve reconstruction
G. Taubin and R. Ronfard

Parameter-estimation in Markov random-field contextual models using geometric-models of objects
S. G. Nadabar and A. K. Jain

The space requirements of indexing under perspective projections
D. W. Jacobs

Iterative smoothed residuals – a low-pass filter for smoothing with controlled shrinkage
M. D. Wheeler and K. Ikeuchi

An improved power Cepstrum based stereo correspondence method for textured scenes
P. W. Smith and N. Nandhakumar

A new image motion estimation algorithm-based on the em technique
C. M. Fan, N. M. Namazi and P. B. Penafiel
