

## From the journals....

### Applied artificial intelligence

Vol. 10 No. 3

#### Articles

Rational model selection in large engineering knowledge bases

*E. Toppo*

Reusable expert-system components development

*W. Dai*

Genetic algorithm with pigeon-hole coding scheme for solving sequencing problems

*S. S. Lam, K. W. C. Tang, X. Cai*

Diagnosis of dynamic-systems based on explicit and implicit behavioral-models – an application to gas-turbines in Esprit project TIGER

*L. Travé-Massuyès, R. Milne*

### Artificial intelligence

Vol. 82 Nos. 1–2

#### Articles

Structure-driven algorithms for truth maintenance

*R. Dechter, A. Dechter*

Probably approximately optimal satisficing strategies

*R. Greiner, P. Orponen*

Knowledge representation and inference in similarity networks and bayesian multinets

*D. Geiger, D. Heckerman*

ALX, an action logic for agents with bounded rationality

*Z. S. Huang, M. Masuch, L. Polos*

On the nature and role of modal truth criteria in planning

*S. Kambhampati, D. S. Nau*

Noise modeling and evaluating learning from examples

*R. J. Hickey*

Optimal composition of real-time systems

*S. Zilberstein, S. Russell*

Knowledge-level analysis of belief base operations

*S. O. Hansson*

Searching game trees under a partial order

*P. Dasgupta, P. P. Chakrabarti, S. C. Desarkar*

Support set selection for abductive and default reasoning

*B. Selman, H. J. Levesque*

On the hardness of approximate reasoning

*D. Roth*

Stochastic modeling of genetic algorithms

*D. Reynolds, J. Gomatam*

A new theorem in particle physics enabled by machine discovery

*R. E. Valdes-Perez*

A test battery for rational database updating

*S. O. Hansson*

On the relative expressiveness of description logics and predicate logics

*A. Borgida*

Vol. 83 No. 1

#### Articles

Measures of uncertainty in expert-systems

*P. Walley*

The token reification approach to temporal reasoning

*L. Vila, H. Reichgelt*

Qualitative system-identification – deriving structure from behavior

*A. C. C. Say, S. Kuru*

Abduction to plausible causes – an event-based model of belief update

*C. Boutilier*

Optimization of the Pearl-method of conditioning and greedy-like approximation algorithms for the vertex feedback set problem

*A. Becker, D. Geiger*

Vol. 83 No. 2

#### Articles

Efficient compositional modeling for generating causal explanations

*P. P. Nayak, L. Joskowicz*

Off-line reasoning for online efficiency, knowledge bases

*Y. Moses, M. Tennenholtz*

Active surface estimation – integrating coarse-to-fine image acquisition and estimation from multiple cues

*S. Das, N. Ahuja*

Relation algebras of intervals

*R. Hirsch*

An overview of incentive contracting

*S. Kraus*

An efficient algorithm for optimal pruning of decision trees

*H. Almuallim*

Integration of weighted knowledge bases

*J. X. Lin*

Vol. 84 Nos. 1–2

#### Articles

Taxonomic plan reasoning

*P. T. Devanbu, D. J. Litman*

Evexed and meet for mechanical design – testing structural decomposition and constraint propagation

*L. Steinberg, N. Langrana*

Qualitative probabilities for default reasoning, belief revision, and causal modeling

*M. Goldszmidt, J. Pearl*

Default reasoning using classical logic

*R. Benelياهو, R. Dechter*

Compromise in negotiation – exploiting worth functions over states

*G. Zlotkin, J. S. Rosenschein*

PALO – a probabilistic hill-climbing algorithm

*R. Greiner*

Limited reasoning in first-order knowledge bases with full introspection

*G. Lakemeyer*

Goal-directed diagnosis – a diagnostic reasoning framework for exploratory corrective domains

*R. Rymon*

Best-first minimax search

*R. E. Korf, D. M. Chickering*

Automatic correlation and calibration of noisy sensor readings using elite genetic algorithms

*R. R. Brooks, S. S. Iyengar, J. Chen*

## Artificial intelligence in engineering

Vol. 10 No. 3

### Articles

Knowledge acquisition method for conceptual design based on value engineering and axiomatic design theory

*H. Kawakami, O. Katai, T. Sawaragi, T. Konishi, S. Iwai*

Neural-network modeling and control for underwater vehicles

*V. S. Kodogiannis, P. J. G. Lisboa, J. Lucas*

Neural-network applications in naval architecture and marine engineering

*T. Ray, R. P. Gokarn, O. P. Sha*

Model-based object recognition – the role of affine invariants

*S. K. Bose, K. K. Biswas, S. K. Gupta*

Component selection using nonmonotonic reasoning

*A. P. Seddon, P. Brereton*

An integrated approach for range image segmentation and representation

*S. K. Bose, K. K. Biswas, S. K. Gupta*

Constraint logic programming for structure-based reasoning about dynamic physical systems

*Y. Elfattah*

Rule-based versus probabilistic approaches to the diagnosis of faults in waste-water treatment processes

*H. G. Chong, W. J. Walley*

Dai-depur – an integrated and distributed architecture for waste-water treatment plants supervision

*M. Sanchez, U. Cortes, J. Lafuente, I. R. Roda, M. Poch*

## Artificial intelligence review

Vol. 10 Nos. 1–2

### Articles

Tribute to – Masoud Yazdani

*E. Simoudis, P. McKeivitt, P. Margules, B. George*

Integration of natural-language and vision processing – grounding representations

*P. McKeivitt*

Work on the integration of language and vision at the University of Torino

*D. Marconi*

On the referential competence of some machines

*D. Marconi*

Understanding language through vision

*C. Meini, A. Paternoster*

From Chinese rooms to Irish rooms – new words on visions for language

*P. McKeivitt, C. M. Guo*

Grounding computational engines

*S. A. Jackson, N. E. Sharkey*

Successful naive representation grounding

*N. J. Sales, R. G. Evans, I. Aleksander*

L(0) – the first 5 years of an automated language-acquisition project

*J. Feldman, G. Lakoff, D. Bailey, S. Narayanan, T. Regier, A. Stolcke*

Grounding symbols into perceptions

*A. Grumbach*

## Engineering applications of artificial intelligence

Vol. 9 No. 2

### Articles

Special section on neural networks and applications

*N. G. Bourbakis*

Optimization of feedforward neural networks

*J. Han, C. Moraga, S. Sinne*

Distributed-memory and localized memory in neural networks

*L. P. Wang*

Generating neural networks through the induction of threshold logic unit trees

*M. Sahami*

Extraction of comprehensive symbolic rules from a multilayer perceptron

*S. Avner*

A neural-network model of the cortico-hippocampal interplay – contexts and generalization

*A. Bibbig, T. Wennekers, G. Palm*

A neuro-expert system for the prediction of software metrics

*J. S. Mertoguno, R. Paul, N. G. Bourbakis, C. V. Ramamoorthy*

Fault-diagnosis for industrial printers using case-based reasoning

*P. W. Grant, P. M. Harris, L. G. Moseley*

Helicopter flight control with fuzzy logic and genetic algorithms

*C. Phillips, C. L. Karr, G. Walker*

Estower – an expert system for the thermal design of wet cooling-towers

*A. K. M. Mohiuddin, K. Kant, R. Sangal*

An expert-system for switching operations for blackout restoration – line, bus-bar and feeder switching

*K. H. Lee, Y. M. Park*

A method of generating objective functions for probability estimation

*J. Billa, A. Eljaroudi*

Vol. 9 No. 3

### Articles

Knowledge-based support of system analysis for the analysis of failure modes and effects

*R. Wirth, B. Berthold, A. Kramer, G. Peter*

A new method for identification and control of nonlinear dynamic-systems

*X. F. Ni, M. Verhaegen, A. J. Krijgsman, H. B. Verbruggen*

Knowledge representation and inferencing techniques developed for a knowledge-based front-end

*S. L. Hartle, K. Jambunathan*

Scheduling as a multidimensional placement problem.

*H. W. Chun*

Performance evaluation of a large diagnostic expert-system using a heuristic test-case generator

*A. J. Gonzalez, U. G. Gupta, R. B. Chianese*

Case simulation to assess learning-systems

*P. Olley, A. K. Kochhar*

Nonlinear dilation network for prediction applications

*T. W. S. Chow, C. T. Leung*

Neural-network applications in predicting moment-curvature parameters from experimental-data

*M. N. Jaidi, D. R. Fairbairn*

An expert-system approach to monitoring the general operating procedures of pwr plants

*M. R. Lee, T. E. Kim, Y. J. Choi*

## Expert systems with applications

Vol. 10 Nos. 3-4

### Articles

Expert systems and artificial intelligence applications in the Pacific-Asian region – preface

*J. K. Lee, R. Mizoguchi*

A spatial scheduling system and its application to shipbuilding – DAS-curve

*K. J. Lee, J. K. Lee, S. Y. Choi*

Heuristic knowledge representation of production scheduling – an integrated modeling approach

*S. J. Park, J. W. Kim, H. W. Kang*

Mapping knowledge to rules for scheduling expert-systems

*A. H. A. Liou, M. T. Wu*

Analog of abstraction – case retrieval and adaptation for inventive design expert-systems

*T. Ishikawa, T. Terano*

Automating concept development by analogical reasoning for advanced decision aids

*R. Kudo, T. Terano*

A simple and efficient method for diagnosing equipment faults based on quantitative physical knowledge

*H. Shimodaira*

Integration of information model (IDEF1) with function model (IDEF0) for CIM information-systems design

*L. Z. Lu, A. C. Leong, R. K. L. Gay*

Knowledge-based html document generation for automating web publishing

*Z. X. Lin, M. Hamalainen, A. B. Whinston*

Interactive induction of expert knowledge

*B. C. Jeng, T. P. Liang, M. Y. Hong*

A structural equation modeling approach to generate explanations for induced rules

*S. K. Kim, J. I. Park*

A computational model for distributed knowledge systems with learning-mechanisms

*H. Aiba, T. Terano*

A method for selecting similar learning data in the prediction of time-series using neural networks

*H. Shimodaira*

A new method for explanation-based learning

*J. Yang, P. F. Shi*

A method of qualitative reasoning for model-based problem-solving and its application to a nuclear-plant

*Y. Kitamura, M. Sasajima, M. Ikeda, R. Mizoguchi, S. Yoshikawa, A. Endou, O. Kakusho*

TR – temporal reasoner

*C. Quek, A. Wahab, W. C. Sim*

APACS – a performance-measurement architecture for constraint satisfaction

*J. C. Tay, C. Quek, S. Y. Huang*

Genetic algorithms based on an intelligent controller

*P. Dangprasert, V. Avatchanakorn*

A representation language for behavior and function – FBRL

*M. Sasajima, Y. Kitamura, M. Ikeda, R. Mizoguchi*

Visual programming environment for hybrid expert-systems

*Y. Koseki, M. Tanaka, Y. Maeda, Y. Koike*

Vol. 11 No. 1

### Articles

The role of expert-systems in integrated curriculum design

*L. C. Wilcox*

A computer-simulation model of juror decision-making

*D. M. Gaines, D. C. Browns, J. K. Doyle*

The common KADS organization model – content, usage and computer support

*R. Dehoog, B. Benus, M. Vogler, C. Metselaar*

A knowledge-based system for the analysis of electrical networks

*A. Micarelli, L. Aiello*

Benefits from expert-systems – an exploratory investigation

*B. Martin, G. H. Subramanian, G. J. Yaverbaum*

An online expert system-based fault-tolerant control-system

*W. Liu*

An expert advisory system for the tourism industry

*B. T. Low, C. H. Cheng, K. F. Wong, J. Motwani*

A knowledge-based expert-system as a pre-post processor in engineering optimization

*D. Lee, S. Y. Kim*

---

## IEEE transactions on knowledge & data engineering

Vol. 8 No. 2

### Articles

4 named to join editorial-board of IEEE transactions on knowledge and data engineering

*B. W. Wah*

A guide to the literature on learning probabilistic networks from data

*W. Buntine*

Advances in feedforward neural networks – demystifying knowledge acquiring black-boxes

*C. G. Looney*

Handling discovered structure in database-systems

*J. F. Roddick, N. G. Craske, T. J. Richards*

A high-level petri-net for goal-directed semantics of horn-clause logic

*J. Jeffrey, J. Lobo, T. Murata*

Optimization of materialization strategies for derived data elements

*D. Botzer, O. Etzion*

Evaluating aggregate operations over imprecise data

*A. L. P. Chen, J. S. Chiu, F. S. C. Tseng*

An object-oriented database system Jasmine – implementation, application, and extension

*H. Ishikawa, Y. Yamane, Y. Izumida, N. Kawato*

Velos – a new approach for efficiently achieving high

availability in partitioned distributed systems

*P. Triantafillou, D. J. Taylor*

Speeding-up external mergesort

*L. Q. Zheng, P. A. Larson*

Online clustering

*A. Bouguettaya*

On coupling multiple systems with a global buffer

*M. S. Chen, P. S. Yu, T. H. Yang*

Describing database objects in a concept language environment

*A. Artale, F. Cesarini, G. Soda*

Theoretical and practical considerations of uncertainty and complexity in automated knowledge acquisition

*X. J. Zhou, T. S. Dillon*

Vol. 8 No. 3

### Articles

Current approaches to handling imperfect information in data and knowledge bases

*S. Parsons*

Intelligent query answering by knowledge discovery techniques

*J. W. Han, Y. Huang, N. Cercone, Y. J. Fu*

Objective-driven monitoring for broad-band networks

*S. Mazumdar, A. A. Lazar*

- Testing expert-systems in-process control  
*K. Finke, M. Jarke, R. Soltysiak, P. Szczurko*
- Optimization of parallel execution for multi-join queries  
*M. S. Chen, P. S. Yu, K. L. Wu*
- Parallel optimization of large join queries with set operators and aggregates in a parallel environment supporting pipeline  
*M. Spiliopoulou, M. Hatzopoulos, Y. Cotronis*
- Path signatures – a way to speed-up recursion in relational databases  
*J. Teuhola*
- A graph-based framework for multiparadigmatic visual access to databases  
*T. Catarci, S. K. Chang, M. F. Costabile, S. Levialdi, G. Santucci*
- A trie compaction algorithm for a large set of keys  
*J. Aoe, K. Morimoto, M. Shishibori, K. H. Park*
- Principles for organizing semantic relations in large knowledge  
*L. M. Stephens, Y. F. Chen*
- A deductive object-oriented database system for situated inference in law  
*S. Wong, S. Tojo*
- Towards the correctness and consistency of update semantics in semantic database schema  
*J. Peckham, F. Maryanski, S. A. Demurjian*
- An optimal resource scheduler for continuous display of structured video objects  
*M. L. Escobarmolano, S. Gandeharizadeh, D. Ierardi*

## IEEE transactions on neural networks

Vol. 7 No. 3

### Articles

- Synchronization and desynchronization in a network of locally coupled Wilson-Cowan oscillators  
*S. Campbell, D. L. Wang*
- Face recognition using artificial neural-network group-based adaptive tolerance (GAT) trees  
*M. Zhang, J. Fulcher*
- Entropy maximization networks – an application to breast-cancer prognosis  
*P. L. Choong, C. J. S. Desilva, H. J. S. Dawkins, G. F. Sterrett*
- A coupled gradient network approach for static and temporal mixed-integer optimization  
*P. B. Watta, M. H. Hassoun*
- Parallel distributed detection of feature trajectories in multiple discontinuous motion image sequences  
*S. Thirumalai, N. Ahuja*
- Worst-case quadratic loss bounds for prediction using linear functions and gradient descent  
*N. Cesabianchi, P. M. Long, M. K. Warmuth*
- Existence and stability of a unique equilibrium in continuous-valued discrete-time asynchronous Hopfield neural networks  
*A. Bhaya, E. Kaszkurewicz, V. S. Kozyakin*
- An approach to stability-criteria of neural-network control-systems  
*K. Tanaka*
- A high-performance neural-network for solving linear and quadratic-programming problems  
*X. Y. Wu, Y. S. Xia, J. M. Li, W. K. Chen*
- Harmonic competition – a self-organizing multiple criteria optimization  
*Y. Matsuyama*
- A categorizing associative memory using an adaptive classifier and sparse coding  
*F. Peper, M. N. Shirazi*
- Randomness in generalization ability – a source to improve it  
*D. Sarkar*
- Generalized deterministic annealing  
*S. T. Acton, A. C. Bovik*
- Shot-noise-limited performance of optical neural networks  
*M. M. Hayat, B. E. A. Saleh, J. A. Gubner*
- Reinforcement learning for an art-based fuzzy adaptive learning control network  
*C. J. Lin, C. T. Lin*
- Traffic management of a satellite communication-network using stochastic optimization  
*N. Ansari, A. Arulambalam, S. Balasekar*
- A training rule which guarantees finite-region stability for a class of closed-loop neural-network control-systems  
*S. Kuntanapreeda, R. R. Fullmer*
- Codeword distribution for frequency sensitive competitive learning with one-dimensional input data  
*A. S. Galanopoulos, S. C. Ahalt*
- Incremental backpropagation learning networks  
*L. M. Fu, H. H. Hsu, J. C. Principe*
- Evolutionary learning of nearest-neighbor MLP  
*Q. F. Zhao, T. Higuchi*
- A fast multilayer neural-network training algorithm-based on the layer-by-layer optimizing procedures  
*G. J. Wang, C. C. Chen*
- Extending the functional equivalence of radial basis function networks and fuzzy inference systems  
*K. J. Hunt, R. Haas, R. Murraysmith*
- Equilibrium capacity of analog feedback neural networks  
*L. Jin, M. M. Gupta*
- Local linear perceptrons for classification  
*E. Alpaydin, M. I. Jordan*

## IEEE transactions on pattern analysis and machine intelligence

Vol. 18 No. 5

### Articles

- Image filtering, edge-detection, and edge tracing using fuzzy-reasoning  
*T. Law, H. Itoh, H. Seki*
- Structure from controlled motion  
*F. Chaumette, S. Boukir, P. Bouthemy, D. Juvin*
- Practical reliable Bayesian recognition of 2d and 3d objects using implicit polynomials and algebraic invariants  
*J. Subrahmonia, D. B. Cooper, D. Keren*
- Scale-space from nonlinear filters  
*J. A. Bangham, P. D. Ling, R. Harvey*
- Multiscale nonlinear decomposition – the sieve decomposition theorem  
*J. A. Bangham, P. Chardaire, C. J. Pye, P. D. Ling*
- Towards a general multiview registration technique  
*R. Bergevin, M. Soucy, H. Gagnon, D. Laurendeau*
- Handwritten word recognition using segmentation-free hidden Markov modeling and segmentation-based dynamic-programming techniques  
*M. Mohamed, P. Gader*

The effect of morphological filters on texture boundary localization

*J. A. Noble*

Recursive implementation of erosions and dilations along discrete lines at arbitrary angles

*P. Soille, E. J. Breen, R. Jones*

Weighted parzen windows for pattern-classification

*G. A. Babich, O. I. Camps*

On the behavior of artificial neural-network classifiers in high-dimensional spaces

*Y. Hamamoto, S. Uchimura, S. Tomita*

Dynamic-programming for detecting, tracking, and matching deformable contours

*D. Geiger, A. Gupta, L. A. Costa, J. Vlontzos*

Vol. 18 No. 6

#### Articles

Associate editors join tpami

*R. Kasturi*

Function from motion

*Z. Duric, J. A. Fayman, E. Rivlin*

Using generative models for handwritten digit recognition

*M. Revow, C. K. I. Williams, G. E. Hinton*

Discriminant adaptive nearest-neighbor classification

*T. Hastie, R. Tibshirani*

Real-time bidirectional search – coordinated problem-solving in uncertain situations

*T. Ishida*

A strain-energy approach to regularization in displacement field fits of elastically deforming bodies

*D. K. Bogen, D. A. Rahdert*

Recognizing human facial expressions from long image sequences using optical-flow

*Y. Yacoob, L. S. Davis*

Reliable online human signature verification systems

*L. L. Lee, T. Berger, E. Aviczer*

Off-line recognition of totally unconstrained handwritten numerals using multilayer cluster neural-network

*S. W. Lee*

Form design for high-accuracy optical character-recognition

*M. D. Garris, D. L. Dimmick*

An extension of geman and reynolds approach to constrained restoration and the recovery of discontinuities

*M. Hurn, C. Jennison*

Complexity analysis for partitioning nearest-neighbor searching algorithms

*P. Zakarauskas, J. M. Ozard*

The normalized string editing problem revisited

*B. J. Oommen, K. Zhang*

## International journal of computer vision

Vol. 18 No. 2

#### Articles

Rigid, affine and locally affine registration of free-form surfaces

*J. Feldmar, N. Ayache*

New feature points based on geometric invariants for 3d image registration

*J. P. Thirion*

The complexity of understanding line-drawings of origami scenes

*P. Parodi*

Matching 3-d anatomical surfaces with nonrigid deformations using octree-splines

*R. Szeliski, S. Lavallee*

## International journal of software engineering and knowledge engineering

Vol. 6 No. 1

#### Articles

Special issue – applications of logic programming in software engineering – guest editors introduction

*P. Ciancarini, L. Sterling*

Animating lotos specifications using Amlog

*A. Togashi, G. Mansfield, N. Shiratori*

Specifying industrial real-time systems with a temporal logic framework

*E. Ciapessoni, E. Corsetti, M. Migliorati, E. Ratto, E. Crivelli*

On the animation of not executable specifications by prolog

*L. Sterling, P. Ciancarini, T. Turnidge*

Towards a theory of elaboration tolerance – logic programming approach

*M. Gelfond, H. Przymusinska*

Representing Cobol in Prolog – towards program comprehension and reengineering

*U. Geske, M. Nitsche*

The impact of intelligent tools on simulation methodology

*P. A. Savory, G. T. MacKulak*

Vol. 6 No. 2

#### Articles

Software engineering practices and tools for real-time systems. 1. Guest editors' introduction

*S. Bhattacharya, R. Mojdehbakhsh, W. T. Tsai*

Perts – a prototyping environment for real-time systems

*J. W. S. Liu, C. I. Liu, Z. Deng, T. S. Tia, J. Sun, M.*

*Storch, D. Hull, J. L. Redondo, R. Bettati, A. Silberman*

A software engineering design tool for modeling hard real-time performance

*K. J. Fowler*

Domain-specific software architectures for guidance, navigation and control

*P. Binns, M. Englehart, M. Jackson, S. Vestal*

Specification and analysis of real-time systems using CSP and Petri nets

*K. M. Kavi, F. T. Sheldon, S. Reed*

The chimera methodology – designing dynamically reconfigurable and reusable real-time software using port-based objects

*D. B. Stewart, P. K. Khosla*

A framework for method evolution and behavior consistency in object-oriented databases

*Z. Tari, X. Li*

Reverse engineering graphical representations of X-source code

*J. H. Cross, R. S. Dannelly*

## Journal of logic programming

Vol. 27 No. 3

### Articles

Compiling constraints in CLP(FD)

*P. Codognet, D. Diaz*

Smallest Horn clause programs

*P. Devienne, P. Lebegue, A. Parrain, J. C. Routier, J.*

*Wurtz*

Vol. 28 No. 1

### Articles

(log) – a language for programming in logic with finite sets

*A. Dovier, E. G. Omodeo, E. Pontelli, G. Rossi*

Amalgamating knowledge bases (3) algorithms, data-structures, and query-processing

*S. Adali, V. S. Subrahmanian*

Vol. 28 No. 2

### Articles

Automatic finite unfolding using well-founded measures

*B. Martens, D. Deschreye*

A closer look at declarative interpretations

*K. R. Apt, M. Gabbrielli, D. Pedreschi*

## Knowledge-based systems

Vol. 9 No. 1

### Articles

Parallel search-and-learn techniques and graph-coloring

*C. P. Ravikumar, R. Aggarwal*

Review of restoration strategies and a realtime knowledge-based approach for bulk power-system restoration

*C. Y. Teo, W. Jiang, H. B. Gooi*

Explaining design plans

*D. T. Ndumu, B. A. Izzuddin, D. L. Smith*

Knowledge modeling for constructing an expert-system to support reforestation decisions

*C. W. Chan, M. Johnston*

Knowledge-based method for building a software system configuration

*M. Bielikova, P. Navrat*

Dimensionality reduction via discretization

*H. Liu, R. Setiono*

Vol. 9 No. 2

### Articles

Reuse of designs

*P. M. Wognum, I. F. C. Smith*

Current status of case-retrieval in engineering domains – an analysis from the knowledge engineering perspective

*F. Maurer*

Redesign of technical systems

*S. J. M. Vaneldonk, L. K. Alberts, R. R. Bakker, F.*

*Dikker, P. M. Wognum*

Redesign and reuse in compositional knowledge-based systems

*F. M. T. Brazier, P. H. G. Vanlangen, J. Treur, N. J. E.*

*Wijngaards*

Reusability of simulation-models

*A. Pos, P. Borst, J. Top, H. Akkermans*

Using adaptation knowledge to retrieve and adapt design cases

*B. Smyth, M. T. Keane*

Controlling functional fixedness – the essence of successful reuse

*L. Dusink, L. Latour*

Vol. 9 No. 3

### Articles

Design by interactive exploration using memory-based techniques

*A. G. D. Garza, M. L. Maher*

Efficient inference method for computing an optimal solution in predicate-logic hypothetical reasoning

*A. Kondo, M. Ishizuka*

Temporal constraint reasoning mechanisms for microprocessor systems diagnosis

*S. M. Yuen, K. P. Lam*

Nodes – a numerical and object-based modeling system for conceptual engineering design

*A. H. B. Duffy, A. Persidis, K. J. MacCallum*

Framework for knowledge-based support in a concurrent engineering environment

*J. V. Harrington, H. Soltan, M. Forskitt*

Vol. 9 No. 4

### Articles

Dynamic route planning with uncertain-information

*F. Golshani, E. Cortesello, T. H. Howell*

Enhancing the blackboard concept to produce a flexible, extensible knowledge-based design tool

*J. G. Harvey, D. D. Harris*

Cooperative software agents for the Unix domain

*A. Poggi*

Integrating machine learning with knowledge acquisition through direct interaction with domain experts

*G. I. Webb*

System for managing and refining structural characteristics discovered from databases

*N. Zhong, S. Ohsuga*

## Kybernetes

Vol. 25 No. 2

### Articles

Silver jubilee – 25th anniversary of Kybernetes – the international journal of systems and cybernetics

Contemporary systems and cybernetics.

*B. H. Rudall*

Intelligence and transmission errors in the brain

*U. Fidelman*

New organization concepts for distributed production systems

*V. Ahrens*

(h,phi)-information measure as a criterion of comparison of experiments in a Bayesian context

*M. L. Menendez, L. Pardo, D. Morales, M. Salicru*

Synthesis of one artificial neural-network

*V. P. Masnikosa*

On the Turing test for artificial intelligence

*E. T. Lee*

General systems studies – inaugural workshop of the international institute for general systems studies

*Y. Lin*

Professor Konrad Zuse – obituary

*D. M. Hutton*

Vol. 25 No. 3

### Articles

Tributes to von Heinz Foerster

*B. H. Rudall*

A conference on the seeds of cybernetics in the work of von Heinz Foerster.

A conference on the seeds of cybernetics in the work of von Heinz Foerster – introduction.

*F. Galuszka*

Cybernetics and circularity – a conference on the seeds of cybernetics in the work of von Heinz Foerster

*R. Vallee*

Presentation of the Norbert Wiener Memorial Gold Medal of the World Organization of Systems and Cybernetics (WOSC) to Professor von Heinz Foerster  
Fuzzy mealy machines

*J. N. Mordeson, P. S. Nair*

Subsystems of general systems

*Q. P. Hu, D. Li, Y. Lin*

Facilities management-systems and automated mapping systems

*P. G. Zheng, G. Plenert*

Intelligent factories using fuzzy expert systems

*E. T. Lee*

Tip of the wave – syntegeation on the move

*W. L. Walsh*

**Vol. 25 No. 4**

**Articles**

25th anniversary of Kybernetes.

*B. H. Rudall*

Highlights of the work of the award winner—Nicholas D. Diamantides

International migration as a dynamic process.

*N. D. Diamantides*

Long-term solar-activity – a glimpse at its pre-telescopic history

*N. D. Diamantides*

Real and artificial neural nets

*A. M. Andrew*

A golden anniversary

*A. M. Andrew*

Agonistic antagonistic systemics – an introduction to bilateral – and paradoxically unilateral – strategies

*E. Bernardweil*

New developments in agonistic antagonistic systems science – variable parameters, partial derivatives, medical applications

*E. Bernardweil, F. Mikol*

Cybernetics and social-science – theories and research in sociocybernetics
