FROM CAMBRIDGE UNIVERSITY PRESS!**

**Bayesian Reasoning  
and Machine Learning**

David Barber

\$90.00: Hb: 978-0-521-51814-7: 650 pp.

**Logical Dynamics  
of Information  
and Interaction**

Johan van Benthem

\$90.00: Hb: 978-0-521-76579-4: 386 pp.

**Scaling up Machine Learning**

Parallel and Distributed Approaches

*Edited by Ron Bekkerman, Mikhail Bilenko,  
John Langford*

\$90.00: Hb: 978-0-521-19224-8: 488 pp.

**Bayesian  
Time Series Models**

*Edited by David Barber,  
A. Taylan Cemgil,  
Silvia Chiappa*

\$80.00: Hb: 978-0-521-19676-5: 432 pp.

**Mining of  
Massive Datasets**

Anand Rajaraman,  
Jeffrey David Ullman

\$65.00: Hb: 978-1-107-01535-7: 328 pp.

**Computational  
Logic and Human  
Thinking**

How to be Artificially Intelligent

Robert Kowalski

\$110.00: Hb: 978-0-521-19482-2: 332 pp.

\$46.00: Pb: 978-0-521-12336-5

**Security and  
Game Theory**

Algorithms, Deployed Systems,  
Lessons Learned

Milind Tambe

\$70.00: Hb: 978-1-107-09642-4: 328 pp.

**Neuromorphic  
and Brain-Based  
Robots**

Jeffrey Krichmar,  
Hiroaki Wagatsuma

\$110.00: Hb: 978-0-521-76878-8: 376 pp.

**Web Data  
Management**

Serge Abiteboul,  
Ioana Manolescu,  
Philippe Rigaux,  
Marie-Christine Rousset,  
Pierre Senellart

\$75.00: Hb: 978-1-107-01243-1: 456 pp.

**Face-to-Face  
Communication  
over the Internet**

Emotions in a Web of Culture,  
Language, and Technology

*Edited by Arvid Kappas,  
Nicole C. Krämer*

*Studies in Emotion and Social Interaction*

\$99.00: Hb: 978-0-521-85383-5: 316 pp.

\$38.99: Pb: 978-0-521-61997-4

Prices subject to change.

JOURNALS

# Journal of Functional Programming

## Editors-in-Chief

Matthias Felleisen, *Northeastern University, USA*

Xavier Leroy, *INRIA Rocquencourt, France*

The *Journal of Functional Programming* is the only journal devoted solely to the design, implementation, and application of functional programming languages, spanning the range from mathematical theory to industrial practice. Topics covered include functional languages and extensions, implementation techniques, reasoning and proof, program transformation and synthesis, type systems, type theory, language-based security, memory management, parallelism and applications. The journal is of interest to computer scientists, software engineers, programming language researchers and mathematicians interested in the logical foundations of programming.

# Mathematical Structures in Computer Science

## Editor-in-Chief

G. Longo, *CNRS and Ecole Normale Supérieure, Paris, France*

*Mathematical Structures in Computer Science* is a journal of theoretical computer science which focuses on the application of ideas from the structural side of mathematics and mathematical logic to computer science. The journal aims to bridge the gap between theoretical contributions and software design, publishing original papers of a high standard and broad surveys with original perspectives in all areas of computing, provided that ideas or results from logic, algebra, geometry, category theory or other areas of logic and mathematics form a basis for the work.

# Natural Language Engineering

## Executive Editor

Ruslan Mitkov, *University of Wolverhampton, UK*

*Natural Language Engineering* meets the needs of professionals and researchers working in all areas of computerised language processing, whether from the perspective of theoretical or descriptive linguistics, lexicology, computer science or engineering. Its aim is to bridge the gap between traditional computational linguistics research and the implementation of practical applications with potential real-world use. The journal publishes research articles on a broad range of topics, an industry-watch column and book reviews. *JNLE* now includes surveys, as well as squibs discussing specific problems.

# The knowledge engineering review

## Notes for Contributors

### Editorial policy

The Knowledge Engineering Review has been established to provide a general source of information and analysis in all areas relevant to research and development in knowledge based systems and applied artificial intelligence. The editors wish to encourage careful preparation of original papers analysing developments in the field. In particular we wish to see tutorial and survey articles, and commentary, criticism and debate. Primary research papers on specialised technical topics are unlikely to be appropriate but research papers on broad topics such as development methodology or general evaluations of tools and techniques, are of interest. Descriptions of specific projects or particular computer systems will be considered if their presentation draws out general issues in the design, implementation or impact of knowledge based systems.

### Submission of manuscripts

Contributions for publication should be submitted as PDF files in an email attachment to either Professor Simon Parsons, Department of Computer and Information Science, Brooklyn College, City University of New York (parsons@sci.brooklyn.cuny.edu) or to Dr Peter McBurney, Department of Computer Science, University of Liverpool, UK (mcburney@liverpool.ac.uk). Submission implies that the manuscript has not been published previously, nor currently submitted for publication elsewhere. Upon acceptance of a manuscript, the author will be asked to transfer copyright to the publisher.

All contributions, whether articles, correspondence or reviews, must be sent in electronic form. Authors are encouraged to provide the final version of the contribution in LaTeX, TeX, or Word format.

Authors using LaTeX should ideally use the KER LaTeX style file which can be obtained using anonymous FTP from the internet address <ftp://ftp.cambridge.org/pub/texarchive/journals/latex/ker-cls>. In case of difficulties obtaining these files, there is a help-line available via e-mail; please contact [texline@cup.cam.ac.uk](mailto:texline@cup.cam.ac.uk). Tables and figures should be embedded in the article in the usual way, with figures in .eps form, which should be also supplied as separate files.

Contributions should follow the general style of papers in recent issues of The Knowledge Engineering Review. The author is invited to nominate up to five possible referees, who will not necessarily be used.

Articles must be accompanied by a brief, informative rather than indicative, abstract.

If you are not using the ker.cls file, then please adopt the following layout rules. Headings should be set out clearly but not underlined. Primary headings should be in lower case, at margin, with Arabic numeral; subheadings should be numbered 2.a., 2.b., etc., and tertiary headings, 2.a.1., 2.a.2. No cross-references should be given by page number, but 'above' and 'below' should be used with the section specified, e.g. Section 2.a.2. The SI system of units should be used. The author should mark in the margin of the manuscript where figures and tables may be inserted. References to points in larger works should, where possible, quote the page reference, e.g. Ager, 1981, p. 102.

Tables should be typed with double-line spacing on sheets separate from the running text. Each table must have a caption that will make the data in the table intelligible without reference to the text.

Illustrations should be drafted for reproduction as full page (148 mm) width. Originals should normally be drawn at twice final area and must be sent in a flat package; larger drawings may delay publication. Lettering should be of a size so that when reduced the smallest lower-case letters will not be less than about 1 mm. Avoid gross disparities in lettering size on a drawing. Duplicates of illustrations should be sent, and may be prints or, preferably, photocopies reduced to final size. Illustrations in the text, both line drawings and photographs for halftone reproductions, will be referred to as figures (Fig. 2, 2a, etc.). Folding plates will not be accepted. Figures composed of photographs should be glossy prints presented at publication scale. Figure captions must be typed with double-line spacing on sheets separate from the running text.

The preferred graphics package is Freehand 5 but files from many others can be accepted. Please indicate clearly the file format (e.g. TIFF, EPS, DCS, Freehand etc), computer operating system and graphics software used for originating the artwork files. The typefaces used in electronic artwork supplied should be restricted to Monotype, Adobe and Bitstream font libraries. Illustrations should be supplied as EPS files and never as Postscript files, or as the native format files from the graphics package used. They should be accompanied by laser proofs with the name and version number of the graphics package used, and also the names of the fonts used.

### References

The accuracy of references is the responsibility of authors. References must be double-spaced and spelt out in full, e.g.:  
Gale, W A, ed 1986. *Artificial Intelligence and Statistics*, Reading, Massachusetts: Addison-Wesley.  
Pearl, J 1984. *Heuristics. Intelligent search strategies for problem solving*, Reading, Massachusetts: Addison-Wesley.  
Tie-Cheng Wang and Bledsoe, W W, 1987. "Hierarchical deduction" *Journal of Automated Reasoning* 3 (1) pp 1–34.  
Pau, L F, 1986. "Survey of expert systems for fault detection, test generation and maintenance" *Expert Systems*, 3 (2) pp 100–111.  
Unpublished work should normally be referred to in the text parentheses as, for example, 'private communication' or 'unpub. Ph.D. thesis, Univ. London, 1988', and not included in the reference list unless in the press.

### Proof Reading:

Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors. No page charge is made.

### Offprints:

No paper offprints are provided, but the corresponding author will be sent the pdf of the published article. Print offprints may be purchased at extra cost at proof stage.

## Contents

- An introduction to argumentation semantics  
PIETRO BARONI, MARTIN CAMINADA and MASSIMILIANO GIACOMIN 365
- A unifying framework for iterative approximate best-response algorithms  
for distributed constraint optimization problems  
ARCHIE C. CHAPMAN, ALEX ROGERS, NICHOLAS R. JENNINGS  
and DAVID S. LESLIE 411
- Survey of directly mapping SQL databases to the Semantic Web  
JUAN F. SEQUEDA, SYED HAMID TIRMIZI, OSCAR CORCHO  
and DANIEL P. MIRANKER 445
- Representing and classifying arguments on the Semantic Web  
IYAD RAHWAN, BITA BANIHASHEMI, CHRIS REED,  
DOUGLAS WALTON and SHERIEF ABDALLAH 487
